Benazir Bhutto Says 60,000 She'll Stay, Fight Zia Protest In Manila

LARKANA, Pakistan — Benazir Bhutto, a central figure in Pakistan's opposition movement, brought her brother's body home for burial Wednesday and vowed to stay and fight the military regime that overthrew and executed ber father, Prime Minister Zulfikar Ali Bhutto

Tens of thousands of supporters greeted Miss Bhutto, who was ac-companied by four other leading politicians, when she arrived from self-imposed exile in Europe with the body of her brother, Shahnawaz Bhutto He was found dead last month at his home in France under circumstances yet to

He had been wanted in Pakistan on terrorism charges.

Bhutto supporters lined the road for nearly 20 miles (32 kilometers) as the body was escorted into Larkana, an agricultural center 200 miles north of Karachi that is the Bhutto family's hometown.

U.S. Anti-Satellite Weapon Is Ready, But Wisdom of Testing Is Questioned

By William J. Broad New York Times Service NEW YORK — Scientists say

that the U.S. anti-satellite weapon, if fully developed, would be vastly more advanced than the Soviet one. They say it would be a marvel of high-technology miniaturization. "If it works, ours is going to be a

NEWS ANALYSIS

lot better," John Pike, head of space policy at the Washingtonbased Federation of American Scientists, said in an interview Tues, "We have been asking Marcos to day. "H's going to be 10 times" Aquino told the protesters in the 10 times as many of them. It's gofinancial district. "Perhaps we ing to be able to place a lot more satellites at risk."

Scientists are generally conficialities, office workers and peas- dent, too, that the U.S. weapon is have to counter that. For that rea- on is something of a blunderbuss all it needs is final testing.

But there is heated debate over whether the United States should go ahead with that testing.

Some experts say that, although it remains militarily useless unless it is finally tested against a target the hope of negotiating a ban on orbiting in space. They say the So-such weapons. They argue that the viet Union already has a working Soviet advantage in this particular weapon, though a more primitive area is minimal and that the United one and the United States must States has a distinct advantage in catch up.

Tass Says Test to 'Militarize' Space

MOSCOW — The Soviet news agency, Tass, said Wednesday that Washington's decision to press ahead with testing an anti-satellite weapon would cause a superpower arms race in space. Tass said in a commentary that Moscow would keep to the unilateral freeze on anti-satellite weapons announced by late Presi-

dent Yuri V. Andropov only if other countries held off too.
"Washington has made another step along the line of preparing for large-scale militarization of space," Tass said. It said responsibility for starting an arms race in space would lie with "those who are

prepared to start dangerous experiments in near-earth orbit." It denounced what it called the cynicism of Washington's assertion that The new anti-satellite test would promote progress at the Geneva resign but he doesn't hear us," Mrs. faster, and potentially there will be talks on nuclear and space weapons. "Washington believes that the rest of the world consists of simpletons who can swallow any propa-

U.S. Says KGB **Uses Chemicals** On Diplomats

By Don Oberdorfer

Washington Post Service
WASHINGTON — The Soviet KGB security police has been monitoring the movements of U.S. diplomats in Moscow with "potentialhy harmful tracking chemicals," the State Department charged

It said that powdery substances had been "applied indirectly"—on automobile steering wheels, seats and other places where U.S. diplomais would come in contact with

It said that the substances could present a health hazard.

The United States protested Monday to Soviet officials in Washington and Moscow "in the strongest terms." They demanded that the practice "be terminated immediately," the State Department said.

The chemical, according to the statement, could "leave deposits on the person or possessions" of Soviet citizens or others with whom the

Americans came into contact. Recent "biological screening tests" determined that the most ex- have resumed them on a heavier tensively used of the tracking ents, a substance known as Nitro Phenyl Pentadein, or NPPD, is a mutagen, the State Department statement said.

This was a potential health hazard, it continued, because mutagens can cause cancers in human

"Mutagens can be, but are not always, carcinogens in human beings," the statement said.

A State Department official said that such tracking agents had been in "very sporadic, infrequent" use the KGB since the 1970s but that U.S. officials had believed that their use was halted in 1982.

This spring and summer, however, a "more widespread" use of the substances was uncovered through routine U.S. tests in Moscow.

The discovery, together with new information about the possible health hazards, caused an alarm "in the last few weeks only," officials

informed of the findings early Wednesday.

Environmental Protection Agency was being sent to Moscow to invesabout the health aspects.

"Preliminary indications sugges that the levels of NPPD and other substances to which individuals may have been exposed is very low. There is no evidence to date that any embassy personnel have suf-fered ill effects due to exposure to tracking agents," the State Depart-

Officials gave very few details of how or where the powder was believed to have been applied to Americans or how the KGB could

use it to trace their movements. Guarded comments to reporters suggested that the KGB may have used chemical testing equipment on the persons, possessions or dwellings of Soviet citizens to determine if they had contact with U.S. diplomats being traced by the

There was no explanation for why the Russians are believed to have stopped sporadic use of chemical tracking agents in 1982 and to basis this spring.

■ Earlier U.S. Charges

The allegation was the latest in a series of charges dating back at least to 1960, when a microphone was discovered in the beak of a wooden eagle on the official seal in a U.S. Embassy office in Moscow, Reuters reported.

Four years later, about 40 eavesdropping microphones were uncovered at the embassy and U.S. officials said many more were probably undiscovered.

In 1978, U.S. security officials found an antenna near the embassy roof that was connected to an electronic snooping booth beneath the building manned by a Soviet agent, according to U.S. officials.

The United States also comained to the Kremlin in the 1970s that its embassy was being bombarded with microwaves in an effort to intercept U.S. communica-

cow and the Soviet Embassy in cow, numbering about 200, were Washington are equipped with sophisticated electronic surveillance A medical team from the Nathe host countries, Western diplotional Institutes of Health and the mats say.

Falwell Seeks to Block South African Sanctions

By Robert Pear New York Times Service

WASHINGTON - The Reverend Jerry Falwell has begun a campaign to block imposition of economic sanctions against South Africa. The step occurred amid growing evidence that American conservatives were deeply divided over the issue.

Mr. Falwell, just back from a visit to South Africa, also denounced Desmond M. Tutu, the Anglican bishop who is South Africa's most prominent clergyman. "If Bishop Tutu maintains that he subject of South Africa when the speaks for the black people of two appeared on a television pro-South Africa, he's a phony," he gram, The Associated Press report-

The bishop, a leading critic of the Pretoria government's racial policies who won the 1984 Nobel as well as social arguments against Mr. Falwell, the head of the

American evangelical Christian group known as the Moral Maiority, gave his impressions of his trip to South Africa at a news conference Tuesday in Washington. He which will be broadcast Sunday urged Americans to support the (Continued on Page 3, Col. 3)

one-ounce gold coins, called Krugerrands, and by investing in companies that do business there. South Africans, Mr. Falwell said,

do not want the United States to reduce investment in their country or to impose economic sanctions. This view, he said was the consensus of those to whom he talked "in every segment of every community" in South Africa.

[On Wednesday, Mr. Falwell engaged in a heated debate with the Reverend Jesse L. Jackson on the ed from New York. [Mr. Jackson told Mr. Falwell,

"You supported apartheid in southern America until it was over. Peace Prize, has offered theological Now you're supporting apartheid in southern Africa while it's still alive." He called the evangelist's views "an insult to Christians."
[Mr. Falwell responded by denying he supported "that policy of the

Botha government. He said that film shot during his five-day trip

Slain Sikh Is Cremated;

The Associated Press LONGOWAL, India - The body of Harchand Singh Longowal, the murdered Sikh leader, was cremated Wednesday in his native village, and Prime Minister Rajiv Gandhi vowed to fight terrorism with all our strength."

Mr. Longowal was killed Tuesday by gunnen, later identified as Sikhs, while speaking at a religious.

As leader of the Akali Dal, the main Sikh party, Mr. Longowal signed a peace accord July 24 with Mr. Gandhi aimed at ending a three-year conflict between the Sikh community and the Indian government over Punjab.

The body of Mr. Longowal, 57, was burned on a pyre after thousands of Sikhs, weeping and shouting slogans, marched 13 miles (20 kilometers) from Sangrur. Wreathed in roses and marigolds, the body arrived in this dusty

village of 9,000 people in a motorcade of 200 vehicles. The cremation took place shortly after Mr. Gandhi vowed that India would not submit to terrorism.

to monra Mr. Longowal's death. Most shops, businesses, markets and schools throughout Punjab were shut Wednesday in a strike called by the Akali Dal to protest

days after Mr. Gandhi announced elections in Punjab, despite warnings by Mr. Longowal and others that the state was not ready for elections and that premature voting

vals and sent to their pharmacist. Neither they nor Brian has held a job for most of the last two decades. They live in public housing and receive welfare. Yet they say they are satisfied with their lives. They live quietly, say they do not dicts or what they call the "rubbish" among the new addict gener-

They insist that they do not "get stoned" by using their day's ration at once or saving it for a binge. They look upon it the way a diabetic regards insulin.

Anne, with badly scarred thin arms, says she would be in the street or "throwing bricks" through pharmacy windows to get the drug. But while the maintenance system worked for people like them, the free dispensing of heroin had a longer-lasting effect that the clinic system could not eliminate.

The U.K. drug problem, without exception, started from legally manufactured, legally prescribed drugs," said Mr. Turner, the British anti-drug official. "It is true to some degree that the elimination of illicit drugs led to illicit supply."

Shortly after the clinic system was established, treatment agencies were required to report addicts to authorities. As the rules tightened in the early 1970s, a small black market began to thrive, catering to those who had been introduced to legal heroin but then had their ac-

Slain Sikh Is Cremated; Gandhi Assails Terrorism

(Continued from Page 1) with no successor in sight and important elections coming up to con-solidate the accord he reached with Mr. Gandhi.

Sikhism, founded in northern India about 500 years ago, claims about 15 million believers. About 13 million are in India, where they make up 2 percent of the population but exert a far greater influence over the economy and politics

than numbers alone might suggest. Their conflict with the Hindu majority centers largely on the northern state of Punjab, the prairie homeland of the Sikhs.

Most of the unrest, killing and terrorism involving Sikh extremists in the last few years, as well as the more peaceful drive for Sikh rights, was focused on autonomy for Punjab, an important grain region.

Sikh separatism had begun to stir with the partition of 1947, when the Sikhs found themselves straddling the new border between Moslem Pakistan and Hindu India. The bulk of those in Pakistan moved to join their co-religionists on the Indian side.

Over the years, Sikhs as a whole

Playboy Ad With Gandhi Angers India Parliament

lived up to their reputation as bard-working and successful people, who contributed more than their share to India's economy. The Punjab, by Third World standards, became a model of development.

But 1947 left the seeds for smoldering resentments. Sikhs felt cheated out of a homeland. There was a feeling that the Hindu-led government in New Delhi was treating Punjab and the Sikhs with less than fairness.

Among their grievances, the Sikhs accused New Delhi of manipulating wheat prices and of steering new industry away from Punjab toward poorer sections of the country. Sikhs were affronted when, in 1966, the government sevnew state of Haryana and then made both of them share one capital. Chandigarh.

By 1982, the main Sikh party, the Akali Dal, broke into the open with movement of civil disobedience. Its principal objectives were considerable autonomy for Punjab and recognition of Amritsar, the Sikhs'

Mr. Longowal followed the nonviolent course charted by Mohandas K. Gandhi before Indian independence, concentrating on strikes and marches. But his movement soon attracted radical elements.

Occasional killing of police offi-cers and others culminated in the major bloodshed of 1983-1984. The militants, thought to number fewer than 1,000, went on a rampage against police officers, politicians and even moderate Sikhs.

The word Sikh means disciple in the first Sikh mystic, the Guru Na- Correction nak, and nine succeeding gurus, or teachers, who preached the Sikh Balram Jhakhar, speaker of the teachers, who preached the Sikh lower house of Parliament, said the Dharma, or path. It was Nanak

New Caledonia May Hold Vote in Fall

PARIS (Reuters) — Elections in New Caledonia could take place by the end of September despite a protracted parliamentary and constitutional battle over the distribution of seats, the minister for France's

territory in the South Pacific said Wednesday. Edgard Pisani said that the elections, set up under a controversial bill passed Tuesday by the National Assembly, could be held on either Sept. 29 or Oct. 6. The bill paves the way for independence of the territory in association with Economic Sept. association with France and provides for elections for four regional councils and a referendum on independence by late 1987.

The poll date first was set for Sept. 8. But the original bill had to be revised after the Constitutional Council rejected its allocation of seats, and conservative members of parliament have said that they also will try to have the amended version declared unconstitutional.

Peru Dismisses 37 Police Generals

LIMA (AP) — The government of President Alan Garcia Perez has dismissed 37 police commanders in the first step of a plan to reorganize

Peru's police forces to rid them of corruption.

The president also has announced that he would completely revamp the judicial system. The dismissal of the police commanders, who hold the rank of general in the military structure of Peru's police forces, went into effect when their names were published in the official newspaper, El Peruano. Twenty-one commanders were in the Civil Guard and 16 were

Sri Lankan Soldiers Killed by Mine

COLOMBO, Sri Lanka (Reuters) — Four soldiers were killed Wednesday when separatist Tamil guerrillas set off a land mine under their vehicle in the northeastern province of Sri Lanka, security offi-

The officials said that the military vehicle was blown up by four guerrillas as it accompanied a government bus carrying about 50 Sinhalese refugees at Serunuwara.

The attack came after President Junius R. Jayewardene ordered an inquiry into assertions, denied by the government, that security forces killed more than 100 Tamils in Vavuniya district in the north last week. A spokesman for the Eelam National Liberation Front, an alliance of four separatist guerrilla groups, has said that more than 100 Tamils were killed and 200 were wounded in an army

U.S. Midwest In Economic Recovery, Leaders Say

By James Barron New York Times Service MACKINAC ISLAND, Michigan — The governors of seven Mid-dle Western states have spent three days giving an upbeat answer to the question of whether the region is pulling out of its decline.
The theme of the three-day gath-

FO Sent Sent Sent

ering, which ended Tuesday, was The Midwest on the Move." But the governors made it clear that the theme did not that the region's residents and wealth were moving to the South or the West.

What is happening, the gover-nors said, is that innovative technologies are being developed here. Of the 10 states with the most patents, six are in the Middle West, and the region has four of the nation's top 10 universities ranked in order of money spent on research and development.

Governor James J. Blanchard of Michigan said that fewer residents of the Middle West were migrating to places that promised more jobs and lower taxes.

To officials who have staked their political careers and their states' futures on bringing in companies and jobs, that was welcome. news. And they are apparently not alone in seeing an upturn. Louis Harris said that his polling organization had found that only the South was more optimistic than the Middle West

"This is a recent trend, believe me," he said. "For most of the past four years, the Midwest has led the nation in gloom and despair. Something obvious is taking place."

But by some measures, the region has a long way to go in its quest for economic well-being. Unemployment was down from 8.2 percent in June 1984 to 7.9 percent this June, according to the Federal Bureau of Labor Statistics. Yet the rate of joblessness in five states in the region - Illinois, North Dakota, South Dakota, Iowa and Ne-

The gathering was sponsored by turnaround, and added: "Each of the Midwestern Governors Conference, which, some officials said had facturers. Employment is at an allcome close to disbanding last year time high and we're benefiting in amid a rift between states with all ways except agriculture."

James J. Blanchard

economies tied to manufacturing and those tied to agriculture.

Some of the manufacturing states also belong to the smaller Great Lakes Governors Conference, which earlier this year signed a charter with two Canadian provinces to prevent water from being piped to states in the South and the vest that need it to continue their growth: Mr. Blanchard said the Great Lakes group met more often than the Midwestern Conference, which, he said, had a reputation of being a "more social" group.

But the dispute was patched up, and this conference opened with Mr. Blanchard borrowing a line from Mark Twain by saying that reports of the region's demise had

been greatly exaggerated.
Attending with him were Governors Robert D. Orr of Indiana, the chairman of the conference, John Ashcroft of Missouri, Terry E. Branstad of lowa, John W. Carlin of Kansas, Richard F. Celeste of Ohio and Robert Kerrey of Nebraska, and Lieutenant Governors James T. Flynn of Wisconsin and Marlene Johnson of Minnesota.

Governors James R. Thompson of Illinois, George Sinner of North Dakota and Martha Layne Collins of Kentucky did not attend or send representatives.

Mr. Orr said that three years ago the last time the group convened on Mackinac Island, a resort island between Lake Huron and Lake braska — rose at least six-tenths of Michigan, "things were not so good a percent in that period." But he noted a us is seeing investments by manu-

Falwell Urges Opposition To Apartheid Sanctions

(Continued from Page 1) us off, our children die."

Representative Robert S. Walker, a Republican of Pennsylvania, said American conservatives were divided on the advisability of such

Younger Republican conserva-tives like Mr. Walker and Representative Vin Weber of Minnesota and Newt Gingrich of Georgia have supported sanctions as a way to prod the Pretoria government into the type of change they have said is needed to prevent anti-American, pro-Soviet forces from taking power there.

There is a split in the conservative community," Mr. Walker said Tuesday. "You have a long-standing position among American conservatives in support of South Airica, nearly a carte blanche attitude that says, Whatever they do is acceptable because it is a nation that is friendly to the West and has great strategic value to us."

"However," he said, "there is now a substantial, growing number of conservatives who say, Yes, support a government that is intransigent to change, which is al- cial separation. most inevitable in that society.

Whites Urged to 'Reclaim' South Africa

By Alan Cowell New York Times Service

PRETORIA - The tones are sonorous and seem reasoned and the message is this: The revolution is coming, and the blacks will try to take all, and the whites will light back for the land that is theirs. And

Over coffee, the words of Eugene Terre Blanche, the leader of South Africa's most extreme rightist not seem particularly perplexing in this land of divided people and raw racial passions cloaked in complex rationales. Elsewhere, they might

South Africa, Mr. Terre Blanche said in an interview Tuesday, was at "the beginning of the bloodiest revolution between black and

"If the blacks start a revolution if our government capitulates and hands over our land, if the blacks start a revolution to destroy our property, rape our women, even our children," he said, "there will be a white force under the leader-ship of the Afrikaner Resistance Movement that will fight back in a kind of counterrevolution. And we will take back our lands which are rightfully ours. We will implement a white people's state."

In the uncharted reaches to the political right of President Pieter W. Botha, Mr. Terre Blanche sugstirred by such talk. He speaks to a segment of Afrikanerdom still far from the centers of power, but his words touch atavistic fears of slave A speech by Mr. Botha in Dur-

ban last Thursday, in which he re-stated a commitment to undefined racial reforms, has given Mr. Terre Blanche's cause ammunition. The same speech has been depicted by others, across the racial divide, as the final rebuff to black aspira-

and the notion of "co-responsibility" with blacks as a means of perpetuating Afrikaner survival. In this context, survival is seen as continued control over everything that affects the lives of Afrikaners and the rest of South Africa's 4.5 mil-

Mr. Botha has so far not enacted any of the promises, but the pledges themselves have become the grist of controversy.

To Mr. Botha's right, for instance, Dr. Treumicht seeks custody of the Afrikaner soul. He argues that Mr. Botha has strayed from traditional apartheid, opening a way to black majority rule. Dr. Treurnicht's argument is that movement is thought to have about Afrikaners seeking power, but have that and seek to implant the racial since largely faded.

Despite their disapproval, Mr. "I am not an extremist," Mr. envisaged by the original theologians of apartheid, an Afrikanns word meaning separateness. "To become free again," he told the Conservative Party's annual

congress in Pretoria on Tuesday we will have to make big, bag changes in the changes the National al Party has made towards multiracialism." The National Party, led by Mr. Botha, has ruled in South Africa since 1948. Dr. Treurment leads those who broke from it in opposition to Mr. Botha's limited

reform program in 1982. That was a traumatic moment for a white tribe that long saw unity as a weapon in its struggle to survive in a continent that offered, in its view, nothing but hostility.

The arguments sometimes seem & little more than variations on a theme of survivalist dogma, computed on racial distinction and proconceptions. At the Conservative Party congress, one delegate was quoted Tuesday as saying blacks were "childlike people" whose lives revolved around sex and who could not think ahead for themselves, so the white man should do their thinking for them.

But the perceived challenge to Mr. Botha from the right is one that haunts his cabinet. It is said, by Western diplomats, to have been a factor in his decision last week to withhold a clear-cut announcement of political reforms that might stem the violence of black townships. where more than 620 people have died since last September.

Mr. Terre Blanche's conversa tion seems to suggest that, when he speaks of re-establishing Afrikaner ominance in the manner of the Afrikaner farmer's republics of the Orange Free State and the Transvaal, there are people of like mind waiting to take up arms to light black domination.

"I do not think," he said Tuesday of South Africa's whites, "that our people realize what dire straits we are in. But the Afrikaner is accustomed to fight."

in speaking of the Afrikaners, Mr. Terre Blanche drew a distinction between those who made the Great Trek and those, like Mr. Botha's forebears, who remained in

'You must understand what Japan has done here,' a Japanese businessman said. 'It is not for us to make a noise.'

since a peace treaty was signed in

Gu Mu, a national Communist Party secretary who led an economic delegation to Tokyo two weeks ago, told Prime Minister Yasuhiro Nakasone that relations were

"marvelously good in all aspects."
However, other pronouncements have offered a more modulated view similar to the one that the Russians have adopted in their ties with West Germany - that the broad development of trade and cultural contacts should not set aside the historical legacy of the

'Japan's ruthless invasion of English-language weekly Beijing help China out of its poverty.

Qian Qichen, a deputy foreign minister, noted in an interview with the Australian Broadcasting Corporation that there were "those in Japan who want to revive militarism, but the Japanese will not

"While it is necessary to be vigi-lant, there is no cause for fear." Mr.

The wariness implicit in such re-marks is compounded by a sense of frustration at the failure of Japan to offer more help in China's drive to modernize its economy. Although the thought is never publicly expressed there is a feeling among educated Chinese that Ja-China is now part of history," the pan has a historical obligation to

ing lopsided. In the first six months of this year, Japan had surplus of

\$2.8 billion, aggravating China's decline of hard currency reserves. Still more irksome from the Chinese standpoint, the Japanese have responded limply so far to requests that they locsen up on the flow of capital and technology.

"The Japanese are our neighbors in Asia, and they have profound historical responsibilities here," a trade official remarked. "We expected more,'

On a personal level, Japanese visiting and living here have gained a reputation for being among foreigners, outstandingly polite and self-effacing. One Japanese businessman, asked why he did not press his case harder with a Chinese government ministry that was dragging its feet on a potentially lucrative deal, replied: "You must understand what Japan has done here. It is not for us to make a

However, there is concern these are becoming rarer as the wartime generation dies out and is replaced by younger Japanese who feel no personal guilt. There was an echo of this in a Chinese protest in

A Chinese spokesman said that the visit would "hurt the feelings" of Chinese since the shrine commemorated such wartime figures as Hideki Tojo, who headed Japan' government through much of the war. When the visit went ahead, Chinese newspapers published reports of protests at the shrine.

For its part, China is using the anniversary to ensure that wartime memories remain alive. The government has organized mass rallies the preparation of special books and films, commemorative stamps academic seminars and wreath-laying ceremonies. The climactic event is to occur Sept. 2, the day of the signing of Japan's surrender, when 100,000 people are expected to lay to the People's Heroes.

The anniversory also is being used for other political ends. Articles, books and films are giving prominence to the role played in World War II by Chiang Kaishek's Nationalist soldiers, later among Chinese that attitudes like defeated by the Communists in a

Trade, Jobs, Currencies

help ailing manufacturers by shutting out foreign competitors. In refreshing contrast, Senator Bill Bradley aims to treat the disease, not just its symptoms. He may not have all the answers, but it is good to find someone in Washington looking to save open trade, on which the world's prosperity depends.

With the dollar costing a third more than in 1981 in international exchange, even the most efficient American producers have trouble competing with foreigners. But protectionism, although tempting, is no fix at all. Tariffs or quotas protect inefficient as well as efficient companies, raise prices and invite retaliation against American products. Just such a cycle of protection and retaliation smashed the world's trading system in the 1930s.

Senator Bradley wants to reduce the political appeal of protectionism by giving workers displaced by imports some hope of other employment. He would use a modest tariff of I percent on all imports to give them a choice between higher unemployment benefits or stipends for retraining and moving to new jobs.

This proposed "Job Security Bank" is still a vague idea. One obvious source of concern is the precedent of using a tariff to raise revenue. If the program is worth doing it is worth financing with general tax revenues. But the underlying concept is laudable: It is immoral and impolitic to expect individual workers to bear the brunt of great economic change.

Senator Bradley has another idea, perhaps even more controversial, for managing foreign

Most members of the U.S. Congress want to exchange rates. To reduce the dollar's value elp ailing manufacturers by shutting out forhe would require the Federal Reserve to sell dollars and stand ready to intervene in curren-

cy markets to prevent any rapid rate changes. The Reagan administration has opposed such intervention, arguing that it interferes with free market forces. But markets are not an end in themselves. The real questions are whether the Fed has the muscle to counter market forces and whether Americans would accept the consequences. At this stage, a determined effort by the Fed would probably be effective, if only because owners of dollars must be ready to believe that these will soon lose more value. But as the trade deficit diminishes the budget deficit crisis would accelerate.

A cheaper dollar would almost certainly reduce imports, reducing the total goods available for government and private purchases and investments. That would leave the Federal Reserve with a tough choice: force up interest rates to crowd out private borrowers who compete with the Treasury, or expand the money supply, in effect inviting inflation to ration credit among public and private investors.

No conceivable trade or exchange policy can have much value unless the United States also puts its fiscal house in order. The American economy needs open world markets to thrive. Managing exchange rates is not the only way to keep them open, and may not be the best way. But Mr. Bradley invites a debate that should have started long ago.

-THE NEW YORK TIMES.

Appearances in Power

The Pentagon has now done just what it had to do in the case of Mary Ann Gillecce. That is good news and bad. In a technical sense the case has been neatly disposed of. Miss Gilleece has been pilloried in a report by the department's inspector general and has resigned. But the almost surgical nature of the process by which she was removed is itself a part of the problem. Words are cheap in cases such as this, but we would have welcomed a few from on high, some sense of indignation on the part of the secretary or deputy secretary. Plainly they care. It would help if they said so. Miss Gilleece has been caught and is gone. What is the lesson? That is what they should tell us.

The inspector general took us as far as a person of his rank can. On several occasions the present inspector general. Joseph Sherick, has shown himself to be an important force for good in the department. The department's senior officials had turned to him on July 3, about a week after stories saying Miss Gilleece was considering setting up a consulting firm appeared in the press. The stories suggested that she was soliciting future business from defense contractors over whose affairs and profits she still exercised official sway.

Before writing to the contractors, Miss Gilleece had gone to the attorney in the general counsel's office who has charge of conflict-ofinterest questions. There is some dispute as to how much she told him and what he replied. Mr. Sherick said he should have been sharper in the advice he gave. He suggested that, in future, ethics advice to senior officials be more formal and in writing, and that the standards of conduct be clarified. But ultimately, he said, "responsibility ... rested with Ms. Gilleece, herself an attorney. [We] do not believe her

culpability is significantly reduced by good

faith reliance on the advice of counsel. Mr. Sherick said there was no evidence that Miss Gilleece had broken the law, or had specifically helped any contractor whose custom she was seeking. Her problem instead was with the departmental rules, he said, which forbid not just conflict of interest but the appearance of it. Appearances - and the public confidence that they can so powerfully affect - are partly what is at stake here. We are compelled to turn to Mr. Sherick. "The actions taken by Ms. Gillecce, and the ensuing publicity, have so compromised her ability to perform her rule making and policy setting role that she can no longer effectively serve the department in such a position," he wrote. Her violations of the rules "created a lack of public confidence in her official conduct."

Defense contractors both are and are not like other private companies in the economy. Their relationship with their prime customer is not the same as the arm's-length relationships that prevail in private transactions. On many issues the interests of department and contractors are the same. Almost every administration looks to the contractors for some of its senior defense officials; as is well known, the contractors recruit from the department in turn. The revolving door is itself a source of public distrust, yet difficult to deal with Congress just tried, again, to legislate against it, and not with much success. The Gilleece case is easy; others are hard. The secretary needs to speak out on them, more than he has. They are ethical issues, and the inspector general's office should not be the only place to which one looks for guidance on them

- THE WASHINGTON POST.

Other Opinion

Karami: At a Loss for Words

What can I say to the citizen when we have lost all sense of values, morality, heritage and civilization? Say or do? Is it any good resigning? Or staying on without the least ability to help people bear the burden? I don't know. - Prime Minister Rashid Karami of

Lebanon, quoted in The Guardian (London).

Marcos: Overrating His Hand?

Cut off from most sources of new credit, faced with a contracting economy, a Communist insurgency, waning popular and international support and growing pressure to im-plement unpalatable political, economic and military reforms. President Marcos is considering calling an early presidential election. The prospect is a worrying one. A clean presidential election, following last year's open and fair egislative poll in which the opposition won a third of the seats, would also strengthen the country's democratic institutions. If this is what President Marcos intends to be the outcome of an early election - one is not officially due until 1987 — then he should go ahead. But there are good grounds for suspicion.

It is true that, under considerable pressure, Mr. Marcos has made some changes. But there has been as yet no fundamental reform such as

doing away with the Philippines' particular brand of "crony capitalism" or the opening of a genuine dialogue with the opposition.

A big reason why Mr. Marcos has been able to get away with half measures is the belief that U.S. political and economic support would go on indefinitely because of Washington's desire to keep its military bases. [He] needs to ask himself how far the United States would be willing to go in defending these important bases. If, as a result of his failure to implement the necessary policies, widespread upheaval were to combine with Communist insurgency to plunge the country into chaos, would an American president sacrifice a single U.S. soldier to defend the bases? Almost certainly not. - The Financial Times (London).

Botha: An Electorate to Fear

Anyone naive enough to believe that President P.W. Botha, with a single bold stroke, would open the door to black power must be blind to the fact that there is more to South African politics than the unrest in the townships and the police action to contain it. Elections are on the way. [Concessions could] un-dermine Mr. Botha's position in the eyes of most white voters and lead to the election of leaders with far more extreme views.

— Neue Zürcher Zeitung (Zurich).

FROM OUR AUG. 22 PAGES, 75 AND 50 YEARS AGO

1910: Paris Dog Captures 'Apaches' PARIS - Fresh laurels were won by the Paris police dog. Capitaine, the companion of two policemen attached to the 8th arrondissement, being instrumental in the capture of two "apaches." Something like a pitched battle was going on between two bands of these individuals when Capitaine and his uniformed comrades came on the scene. At once the "apaches" united forces and opened fire on the police. The dog was let loose and a moment later he was in pursuit of the bandits who at the sight of him had taken to their heels. Capitaine, however, succeeded in keeping two of them

fast prisoners until policemen arrived.

1935: Boeing Bomber Sets Records DAYTON, Ohio - A new chapter in the possibilities of aerial warfare was written when the giant new Boeing "flying fortress," 15 tons of potential death, landed here after making a non-stop test flight of 2,300 miles [3,700 kilometers] from Seattle in exactly nine hours at the speed of 255 miles an hour. The huge armored bomber hurtled through the air at an altitude of 10,000 feet, smashing all world records for military planes. This is the most formidable death machine ever given a public demonstration. One ton of bombs can be carried, and five gun turrets enable the bomber to protect itself from attack on every side.

America and Japan Should Make Peace and Link Up

WASHINGTON — In the recent 40th anniversary celebration of the end of By Howard H. Baker Jr. World War II, two facts were obscured that

nced to be made clear. First, America is still at war with Japan. Second. it is losing.

I visited Japan not long ago, congratulated everyone from Prime Minister Yasukiro Nakasone on down for Japan's incredible post-war trade success, told them it was causing Americans quite a lot of trouble and suggest ed that it would cause them trouble next I don't think anyone was listening The largely cosmetic "action package" of trade reforms announced by the Japanese govern-ment in July only reinforced that feeling

Having returned from Japan to hear a ris-ing chorus of protectionist sentiment from my former colleagues in Congress, I believe it may be worthwhile to offer a few ideas on what can be done to end the war, secure the peace and increase the prosperity of the two countries and the world at large.

The one-sided nature of trade between

America and Japan in recent years is familiar to everyone. What is less well known is that these persistent trade imbalances have been so large for so long that America is rapidly accumulating a foreign debt surpassed only by its federal deficit. By 1990, that trade deficit could well total a trillion dollars.

It should be noted here that Japan is not the only trade problem the United States has. But it is the biggest one, and if this problem can be solved, they all can.

I think it can be solved, in three stages.

In the short term, Americans must get the attention of the Japanese and let them know they are serious about this issue. The Senate's recent resolution condemning Japan's trade practices — a resolution that passed on a 92-0 vote — is one way of getting Japan's aften-tion. The flurry of increasingly protectionist bills in Congress is one way of keeping it.

But Americans must remember that they are dealing with live ammunition here, and take care not to shoot themselves in the foot The disastrous Smoot-Hawley Tariff Act of 1930 was rushed through Congress in a similar mood, and it took 14 years and a world war to straighten out the mess. Still, it is not too much to ask - even to

demand - that the Japanese give America better access to their domestic market, in return for keeping the vast and lucrative American market open to them. I frankly doubt that many American con-

sumer goods will interest many Japanese consumers, particularly until American manufacturers make a more conscientious effort to

The writer, a lawyer, was Senate majority leader from December 1980 to last January.

But in the fields of finance, telecommunications, government contracts and other largescale enterprises. I believe both countries would profit by greater American participation in the Japanese economy.

The second stage of the solution is to do

everything that America can unilaterally to improve its trade position. This involve among other things, reducing the federal defi-cit, rechecking the stock of exportable goods and preparing more diligently and deliberately to compete in a global market.

As for the deficit, Congress labored might

ily and courageously this year to reach what

the wider world saw as a largely cosmetic deficit reduction package — much as it saw Mr. Nakasone's "action package" of trade reforms. The hard truth is that Congress must do more next year, and the next, and the next, before the deficit problem nears solution. As for exports, it may well be time to reconsider the prohibition on sales of Alaskan North Slope oil to Japan. That prohibition was imposed in a time of energy crises and embargoes, and while it may have made sense

at the time, it does not make much sense now that we are awash in a sea of oil. Several billion dollars could flow America's way almost immediately with the flow of Alaskan oil to Japan. Washington should at least put it on the table and see what it can get in trade. As for preparing to compete with the world, I agree with the governor of Tennessee,

Lamar Alexander, that this is "the greatest challenge for America's future," and I am happy to point to my own state of Tennessee as a model for such preparation.

I told the president of Nissan not long ago

that, with a combination of Japanese industrial technique and American pride, we are building better Datsuns in Smyrna, Tennessee, than they build in Tokyo. And the people of Spring Hill, Tennessee, working with the people of General Motors, are looking forward to selling a truly competitive American automobile, the Saturn, to the whole world.

The third and final stage of the solution is for the United States and Japan to understand and agree that they have a special role

of mutual leadership to play in the world, that this role will expand and intensity in the new century just ahead, and that they cannot play this critical role successfully if they cannot work well together at every level of enterprise. With apologies to other friends and allies of

adapt their products to Japanese preferences. America around the world, the plain fact is that the United States and Japan share an economic diversity and a technological capac-

ity that no nation or group of nations can match. If current trends continue, this distinction will only be more pronounced in the future. Both sides must be prepared to deal effectively and wisely with this emerging economic and political reality. One step in that preparation might be to

establish a new form of trading currency between the two countries that reduces or eliminates the disparity between the yen and the dollar. We might include Canada — the largest U.S. trading partner, with which the United States has its second largest deficit in this new currency arrangement, creating our own version of the European Currency Unit that serves the Common Market.

Another step, solely up to the Japanese, whose success has made them the "OPEC of trade," may be to recycle a substantial portion of their trade profits in a comprehensive and constructive program of foreign invest-ment. Tennessee has benefited handsomely from such investment, and Japan could win a

with an expanded investment program.

Much of the Third World, for example, still reels from the effects of the other OPEC's reign of greed Japan could make a major contribution, worthy of its standing in the first rank of global economic power, to the alleviation of the Third World's distress and to the construction of a more prosperous and

productive world economy. Whatever specific steps may be required to cement this new and special relationship between the two countries, those steps must be taken in a spirit of mutual respect and with minimum of pettifoggery.

American politicians must undertand that

U.S. policy cannot be "Let their Toyotas siton their docks," because Americans like Toyotas and want to buy them. Japanese politicians must understand that cosmetic concessions, arrived at only after the

most torthous negotiations, will try the pa-tience of a frustrated Congress and may lead to protectionism of the most virulent strain. In short, there is no political or economic profit in continuing this war, which both sides would ultimately lose. The time has come for peace among friends, and for progress and prosperity in which all nations can share.

The New York Times.

Criticizing South Africa: Israel Should Clean Up Its Own Act

FIRST encountered the charge that Zionist racism makes Israel comparable to South Africa in the early 1970s, while I was chief representative of the International Student Movement for the United Nations. I protested vehemently in a personal letter to an assistant of Secretary-General Kurt Waldheim. Officials of the American Zionist Youth Foundation sent copies of that letter to Jewish university students in the United States and Israel, and then commissioned me to write monthly articles on Zionism for their newsletter.

I next confronted the Israel-South Africa comparison at Princeton University while obtaining a master's degree in international affairs. Professor Richard Falk, himself Jewish, repeatedly linked the situations of the two countries in his course on international law. I remember sharing the outrage of my Israeli student col-

leagues. Once again I protested. In my subsequent work for the W "just") 125 years ago the Unit-American Jewish Congress and the ed States began solving a racial prob-World Jewish Congress, and on un-related journalistic assignments, I traveled widely in the Middle East.

My perspective broadened. I provide my own history to make clear that for years I aggressively challenged comparisons of South Af-rica and Israel. Now I have come to

methods of repression against the Palestinians parallel those of white South Africa against the blacks.

Analogies are always imperfect an-

QUEENSTOWN, Maryland — Thirty or so liberal arts profes-

sors from small colleges spent the

better part of a recent week ponder-

ing American values in a wooded grove on the Wye River not far from here. The "readings" ran from Aristotle and Plato to Machiavelli,

the Declaration of Independence, Lincoln and Franklin Delano Roo-

sevelt. A few nonacademic gadflies

were invited along to lend contem-porary context and/or comic relief.

In that spirit, I offered what

struck me at the time as a Construc-

tive Thought. We were talking

about "citizenship in the American polity" (about how well we govern

ourselves); the consensus seemed

to be that the system doesn't work.

By way of striking a positive note,

ventured the proposition that

> MARIORIE A. STEELF Antibes, France.

By Walter Sullivan
New York Times Service THE world of animal vision, long a gray area for scientists, is beginning to come alive with color.

While research in the field is in its infancy, recent findings indicate that some species see brightly hued landscapes in colors invisible to human eyes, where others see drab colors or none at all.

What does the world look like to a bird, a bee, a goldfish, a cat? What color does a bull see when confronted with a red flag? Does the "color blindness" of some monkeys explain the origin of such defects in human beings?

For centuries there was no way to answer many of these questions because it was so hard to determine whether an animal could see a particular color. But new testing meth-

ods are making it possible. Animal research may lead to a better understanding of human vision. Researchers are discovering many parallels between color vision in animals and humans, particularly in connection with color

Dr. Gerald H. Jacobs, a specialist on animal vision at the University of California at Santa Barbara, has been studying color blindness magnetic impulse corresponding to in Peruvian squirrel monkeys. in Peruvian squirrel monkeys.

panels whose colors can be altered. and a color message is sent to the In each test, two of the panels are of identical color and the third is different. If the monkey can identi-

fy and push the panel whose color tanopia, occurs in people lacking copy of human trichromacy," vis different, a banana-flavored food cones that are sensitive to 559 sion based on recording three parts ruice is delivered.

Dr. Jacobs, a professor of psychology, said that, apart from man 531 nanometers. In tritanopia, af no better than that of cats. and primates, most mammals feeting less than one person in probably had only two types of 15,000, a failure to distinguish blue ability to discriminate between allowed therefore have arises from a lack of cones sensitive most identical shades, wavelength relatively poor color vision.

Humans are rarely, if ever, totally color-blind, but almost 8 percent of Causasian males lack functioning sensors in one of the three categories needed for full color vision. The human retina contains two basic kinds of receptors: cones, which provide the basis for color vision, and rods, which record faint light.

ment particularly sensitive to one of three parts of the light in the electromagnetic spectrum. The peak response of one class of cones is to a wavelength of 419 nanometers (billionths of a meter) in the violet part of the spectrum. Another class is most sensitive to 531 nanometers, or green. The third class of cones responds chiefly to 559 nanometers, a shade of green, but its range of sensitivity extends

The animals are exposed to three along that impulse to the nerves

Each cone contains a photopig-

to yellow and red. The cones receiving an electro-

pellet or a small serving of grape nanometers. Deuteranopia, or impaired perception of green, occurs no definitive studies of dogs' color in those without cones receptive to

> to 419 nanometers. Like the color-discriminating apparatus of the human eye, that of insects depends on recording and comparing light intensities in these three regions of the spectrum. But what a person sees and what an insect sees can be vastly different.

Being sensitive to ultraviolet light, a bee zeroing in on a black-eyed Susan sees a bull's-eye pattern at all, which may help them find flowers or ripe fruit. in what to human eyes are uniformly yellow petals. Because the bee's e cannot see red, a white phlox blossom looks blue-green.

Bucknell University in Lewisburg. Pennsylvania, an authority on insect vision, says the flowers look white to human eyes because human retinas are sensitive to red, green and blue, which produce white when mixed. The bee, however, cannot see red.

HE new research in animals is changing some old notions about what they see. Dr. Jacobs says cats are not totally color-blind, as once thought. Nevertheless, he believes feline color vision "is at best a pale

sion based on recording three parts of the spectrum. There have been vision, he added, but it is probably

differences of only a few billionths of a meter. Pigeons use a combination of photosensors and light filters that may record as many as five different spectral bands.

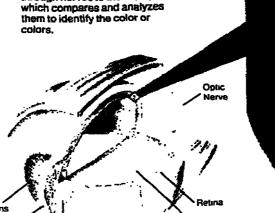

Some animals that are daytime feeders, such as hummingbirds, can see into the ultraviolet part of the spectrum that humans cannot see

Frogs, in tests with illuminated panels, show a preference for blue, and it appears that color vision is common in amphibians. However, Dr. Kenneth M. McCrea of Dr. David J. Ingle of the Eye Research Institute in Boston, who has been working with frogs, notes that the limits of their color perception have not been established. Reptile retinas are rich in the receptors normally used for color vision, but their ability also remains untested.

Goldfish, like humans, have three classes of color receptor and their performance has been tested in various laboratories, including that of the Rowland Institute for Science in Cambridge, Massachusetts. Early this year, Dr. Ingle, then at Rowland, reported that goldfish determine the color of a surface not by merely measuring its fish, if trained to obtain a bit of characteristics are assumed to be trasting it with the light from other could identify it among repeatedly elements of the scene. Such "re- juggled panels of other colors, even

Bid for 'Green Revolution' in Africa Bringing a Few Glimmers of Success

By Philip M. Boffer New York Times Service scientists are reporting glimmers of

success in efforts to design "miracle crops" for Africa. In recent months, farmers in Zimbabwe have achieved record harvests of maize using a high-yielding hybrid developed by agricultural researchers, a high-yield, drought-resistant strain of sorghum has been distributed to some farmers in Sudan and progress has been claimed toward developing new varieties of other staple food

crops in Africa. Nobody expects an overnight technological revolution in African agriculture. But some scientists believe science may ultimately do for tion of chronic food shortages and

· - - =

periodic famines. "The job is going to take some problem now. Africa has brought many scientists to their knees on this mastica." administrator for science and tech

> Prospects for improved agricul-But similar promises about im- tural productivity in Africa are unproving African agriculture have certain. Many scientists draw hope been made for decades with little to from the fact that agricultural reshow for it so far, said Carl K search has increased crop yields in Eicher, professor of agricultural Asia and Latin America in recent economics at Michigan State University, who has performed per-haps the most extensive recent re-have been prodigious. India, which views of agricultural technologies relied heavily on imported food in the 1960s, is largely self-sufficient in cereal production. Bangladesh, widely described as a basket-case two decades ago, is approaching self-sufficiency. China, which suffered a devastating famine between formance, and there's a credibility 1958 and 1961, is exporting food, an achievement that Chinese officials attribute partly to improved comp varieties and partly to govern

> > But Africa has a harsher climate, its land is more depleted and its countries are generally poorer. It has far fewer trained scientists and research institutions and its inexperienced governments have been unwilling or unable to adopt policies that favor agricultural development over urban development.

1 WENTY years ago, Professor Eicher said, international experts believed they could quickly transfer Green Revolution technology to

"Coming up with a Green Revotional programs at the University of Nebraska and director of an international program, financed by AID, to develop new varieties of two staple grain crops in Africa, sorghum and millet.

Perhaps the most recent research success is a high-yielding, droughtresistant strain of sorghum devel-oped in Sudan, one of the countries most severely affected by the drought. "It's so new that they're right now trying to get it into the hands of farmers," said Mr. Brady.

Dr. Woods Thomas, director of international programs at Purdue University, said several new hybrid sorghum strains had been developed by scientists working in Su-dan in the past six years. He said that one strain looked "very, very promising" in test plantings last year; its seed is being multiplied for distribution to farmers.

Similar gains may be on the more distant horizon with millet. "Very little work has been done with millet over the years," said William D. Stegmeier, a research agronomist at Kansas State University, one of the leading U.S. centers of millet research. "I suspect part of the reason is that it's a crop consumed by the poorest people in the poorest areas of the world. But in the last few years it's been receiving a lot more attention, especially in Africa."

He said new varieties of millet were being grown on a small scale in several communities in Sudan. including one that matures more quickly, making it potentially useful when the rainy season is short.

The most dramatic practical suc-

cess so far, Mr. Brady said, is the recent widespread adoption in was interesting in the property of the propert ment research stations. This year's maize crop in Zimbabwe far exceeded expectations, Mr. Brady said largely because the strains were used on small farms more widely than anyone predicted. "The notion that poor people won't accept new technology is hogwash," he said.

IN BRIEF

Dinosaur Bones Found in Alaska

ANCHORAGE, Alaska — More than 150 dinosaur bones have been discovered on Alaska's North Stope, a find that casts doubt on the theory that two months of darkness from a huge dust cloud after an asteroid collision with Earth caused dinosaurs roamed the north when it was a

subtropical swamp, said Professor William Clemens of the University of California at Berkeley. It also "suggests that dimosaurs, at least some of Africa, but the crops ran up against them, were adapted to an environment where they had to contend with six new diseases, soils and weather weeks to two months of darkness" a year, he said; they thus would have conditions. been relatively unaffected by the asteroid dust cloud.

been relatively unaffected by the asteroid dust cloud.

In another recent paleontological find, more than 20 pounds (9 lution in Africa is going to be a much tougher job than it was in lindia or Mexico," said Glen Vollton site near the La Brea Tar Pits. Scientists said the find should provide the first clear idea of what Southern California was like shortly after the the first clear idea of what Southern California was like shortly after the most recent Ice Age, 15,000 to 25,000 years ago.

And near Frick, Switzerland, scientists reported finding what appears to be a complete skeleton of a plateosaur, 210 million years old and

measuring 5.8 meters (19 feet) from head to tail. (AP, LAT)

Rockefeller Gift to Sloan-Kettering NEW YORK (NYT) - The Memorial Sloan-Kettering Cancer Center

has received a \$36.2-million gift from Laurance S. Rockefeller. The has received a \$30.2-minion gut from Laurance S. Rockefeller. The hospital plans to build a \$78-million research and conference center, partly financed by the donation and named in honor of Rockefeller's father, John D. Rockefeller Jr., officials said.

The gift, which officials called one of the largest ever by an individual the state institution. Come in research to a \$200 million for the largest every by an individual to a builty case institution.

to a health-care institution, came in response to a \$300-million fundraising drive, bringing the drive just over halfway to its goal.

Supersensitive X-Ray Camera Made

WASHINGTON (NYT) — Scientists from the Los Alamos National Laboratory in New Mexico have developed a supersensitive X-ray camera to be carried by the space shuttle. Military Space, a Washington newsletter, said the camera was meant to provide precise detection of nuclear weapons tests in Earth's atmosphere.

nuclear weapons tests in Earth's atmosphere.

"We will use natural X-ray sources — stars and galaxies — to test the imaging capabilities," said Dr. Ed Fenimore, a Los Alamos physicist.

The camera consists of 20 six-sided metal plates, each with more than 26,000 holes. Each hole acts as a pinhole camera. Current detectors can pick up X-rays with energy of fewer than 5,000 electron volts; Los Alamos scientists said their camera would be sensitive to X-rays of 2,000 to 60,000 electron volts.

Rats Fine After In-Utero Space Trip MOSCOW (AP) — Tass has amounced the birth of healthy baby rats

on Earth after a period of gestation in space.

The official news agency was reviewing the results of Cosmos-1,667, launched July 10 with 2 monkeys, 10 rats, 10 tritons, 1,500 flies and fish aboard. The animals returned safely to Earth after a week in space, Tass aboard. The animals returned safely to Earth after a week in space, Tass appears. The annuals returned safety to rearth after a week in space, Tass said. The flight was carried out in cooperation with scientists from the United States, France and four East Bloc nations, it said.

United States, France and four past bloc handles, it said.

It did not say when the rats were born, or at what stage of pregnancy their mothers were sent into space. It said the experiment with the rats was the first of its kind in space exploration.

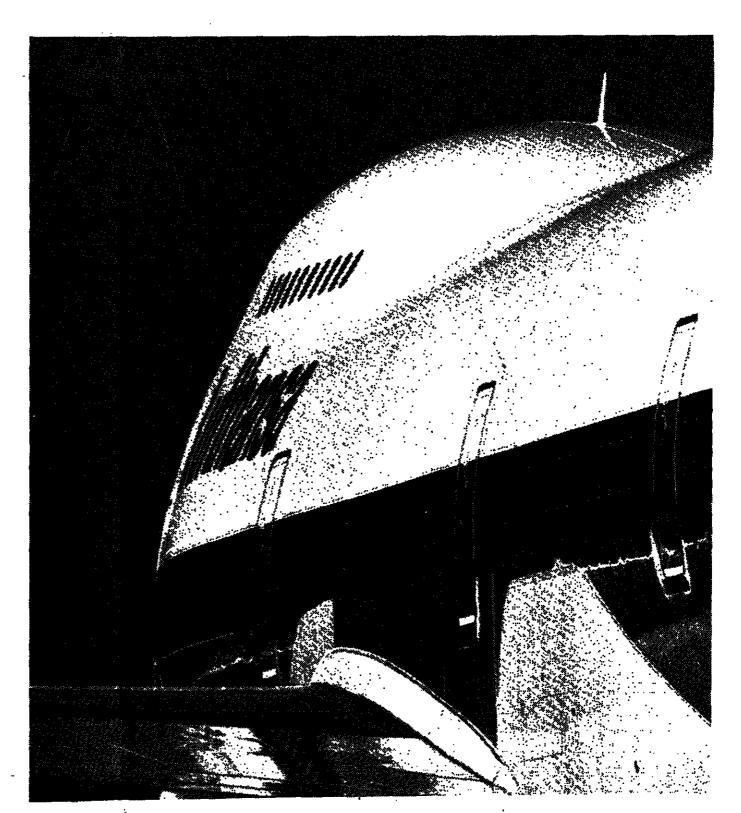

Cough Syrup Used Against Infertility WASHINGTON (UPI) — A fertility specialist says a common ingredi-

the uterus, causing infertility. Dr. Jerome Check, an associate professor of obstetrics and gynecology Dr. Jerome Cneck, an associate processor of obsterries and gynecology at Thomas Jefferson University in Philadelphia, said small doses of cough syrup or cold capsules containing the expectorant, guiafenesin, can thin the mucus. He said conventional treatments could cost \$600 a month the mucus.

while a bottle of cough syrup was about \$1.70.

Other specialists have criticized Dr. Check's research because he did not use scientific controls. But Dr. Joseph Bellina, an adviser to the National Institutes of Health and director of a fertility research center in New Orleans, said he frequently recommended the treatment.

move will have to include the participation of the broader market, the traders said. Analysts also noted that while trading volnme has picked up from the very slow pace earlier this week, it remains relatively light and indicates that much of Wall Street continues to

view the outlook for stocks with cantion.

Robert Stovall of Dean Witter Reynolds said it was too soon to say whether the climb, combined with Tuesday's advance, constituted a change in market direction. The moves up have occurred "in a vacuum of trend-changing develnoments." he said.

Mr. Stovall said that the market has drawn some support from a softer interest rate trend,

the result of flat economic activity.

"The tone of the market is pretty good," said
Robert Colby of Smith, Barney Harris Upham.
Since the market has been down for about a month, people are reluctant to believe the trend is changing, he said.

Still, the decline appears to be over for the short term, Mr. Colby said. "We think there is a

THURSDAY, AUGUST 22, 1985 **WALL STREET WATCH**

Butcher-Singer Analyst Likes Contrarian Signs

By EDWARD ROHRBACH

ARIS - Wall Street these days has the bulls and the bears buffaloed. Analysts and investors are groping around the stock market like blind men feeling separate parts of an elephant, each coming to different conclusions about the nature of the beast.

The bears temporarily have control of the market — there's a definite downward bias," said Richard Yashewski, technical analyst for Butcher & Singer in Philadelphia.

"But this clearly is not the time to run for Noah's Ark," he asserted. He describes Wall Street as only being in the midst of a "summer thunderstorm" Analysts see little

needed to wash away "some temporary excesses and prepare the technical foundation for a productive and potentially explosive upside rally

downside risk, much upside potential, What Mr. Yashewski likes in current market. best about Vall Street are the so-called sentiment indica-

tors. He said these now show dampened enthusiasm toward stocks, which is usually taken as a contrarian sign that the market has room to move up.

Therefore, "Sentiment is the most powerfully bullish it's been since July 1984," he said, noting that even optimism among professional market advisers, which had been high, currently shows some 30 percent of them outright bears, the highest figure since shortly before last January's upward surge on Wall Street.

"Sentiment figures are saying there's minimal downside risk in this market, probably just above 1,300," he said.

With the bond market in a "rally mode and stocks oversold," he sees Wall Street "building a foundation that will propel the Dow well over 1,400 in the final months of 1985."

Meanwhile, Robert Farrell, Merrill Lynch's chief market ana-

lyst, also sees a "good case" for stocks to begin advancing soon. However, he warns that the rally will have to show "breadth and rekindle buying interest" or risk aborting and sending Wall Street into a "10 to 15-percent shakeout" before the end of 1985.

E THINKS most investors are too complacent long term.

Investors, he says, are either overly confident now on the fundamental side because they are looking ahead to a resurgence of the U.S. economy, or feel comfortable from a technical point of view because they expect that even if Wall Street is topping out, as cyclical factors indicate, the process will be slow and allow time to get out.

The market's current doldrums, he said, are probably the result

of it being in a transition stage, moving from being "interest-rate

driven to earnings driven."

He added: "Some groups likely to respond to the next rally attempt are chemicals, construction machinery, metal and mining and selected emerging growth stocks."

Alan Shaw, technical analyst at Smith Barney, also sees the "short-term picture brightening somewhat." But he warned about the "growing probability in the months ahead of a cyclical correction — an event that seems to unfold every four years or

Philip Roth, E.F. Hutton's technical analyst, sees the stock market fenced in, with downside risk less now because sentiment indicators have improved, but he argues that supply-demand indicators also show that rally potential is limited. "It will be several months or more before the conditions for

final stages of a business expansion that began in November 1982. He expects a recession in 1986.

Implications for the stock market include the positive factors of low inflation plus increased liquidity as interest rates decline (Continued on Page 13, Col. 4)

H.K. Bank To Open In China

Beijing Allows Foreign Branch

By Jim Mann

BEIJING - For the first time since the Communist takeover in 1949, China on Wednesday gave permission for a foreign bank to open a branch inside its borders.

Chinese authorities approved a request by Hong Kong & Shanghai Banking Corp., Hong Kong's leading financial institution, to establish a branch bank in Shenzhen, the special economic zone China has set up alongside the British colony.

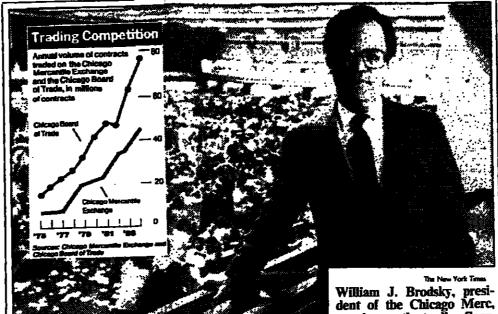

Representatives of foreign banking companies, many of which have been waiting since 1979 for permission to open branches in China, were generally pleased. "It's the first step towards liberalization, towards allowing foreign banks to do more business here," said the representative of one U.S. bank.

But they cautioned that the restrictions on foreign banking in China remain severe. So far, China has agreed to consider applications for foreign bank branches only in the four special economic zones in southern China: Shenzhen, Zhuhai, Xiamen and Shantou.

In addition, foreign bankers pointed out that the powers of the new branch will be carefully limited "They can't get involved in for-eign currency banking," said one banking official in Beijing, "It's still a long way from being a real bank branch."

The new branch will, however, be permitted to make loans, to accept foreign-currency deposits, to issue guarantees and to handle export and import transactions.

Until now, four other banks have had functioning branches in China, all in Shanghai: Hong Kong & Shanghai, Chartered Bank, Bank of East Asia Ltd. and Overseas-Chinese Banking Corp. The four banks have been in China since the establishment of the People's Republic in 1949, but they have had no power to accept deposits or make loans.

Chicago Merc Faces New Challenge

Board of Trade Shows That It Can Be Innovative, Too

By Steven Greenhouse

New York Times Service CHICAGO — For years, the Chicago Mercan-tile Exchange was known for having the hottest ideas around. It pioneered trading in currency futures and livestock futures.

But now its creative juices, some traders say, seem to be slowing just as they are starting to flow, albeit belatedly, at the Chicago Board of Trade. And that may be turning the tables not just on image, but also on growth.

"The real question for the Merc, the challenge they face, is what do they do next," said John M. Blin, director of options at Lasser Marshall Inc., a leading New York-based currency broker. Mr. Blin, who developed the Eurodollar futures con-tract for the Merc, added, "The Merc led the way in exchanges developing new products and diversifying their offerings. But now it appears that the major innovations in futures and options are probably behind us.' Two of the Merc's most recent ventures have

started slowly. Trading in several of its currency options, introduced earlier this year, has stumbled, hampered by competition at other exchanges. And despite much fanfare, its recent link-up with the Singapore International Monetary Exchange has had unimpressive volume. "The competition has definitely intensified,"

said William J. Brodsky, who assumed the exchange's presidency June 1. But Mr. Brodsky, 41, is confident that the Merc will continue to prosper. Developing new products that will draw interest and trading volume is a critical role for any ex-

its growth — and the growth of its members — depends on diversification and a continuing flow of new products, should trading in other areas flag. The Merc understands this well. The exchange

brokerage firms and individuals who trade on the

exchange's floor. Like most businesses, however,

has long been dwarfed by the much bigger Board of Trade, founded in 1848, whose corn and soybean trading far outstripped the Merc's trading in butter, eggs and cattle. In fact, the Merc, which was founded in 1898 as the Chicago Butter and Egg Board, has always seemed to be running to

But while the Merc remains No. 2 in volume, its rate of growth from the early 1970s to 1983 far outstripped the Board of Trade's. The big breakthrough, both for the Merc and for the commodities industry, came with the exchange's introduc-tion of financial-futures contracts, which enabled customers to protect themselves against currency and interest-rate fluctuations.

And the Merc has more new twists forthcoming according to Leo Melamed, a former Merc chairman and the wizard behind the financial-futures revolution. He rejects any suggestion that the Merc has slowed down or that the Board of Trade has surpassed it as an innovator. Mr. Melamed said the Merc's plans to trade futures on European currency units and zero-coupon bonds attest to its continued innovativeness.

Some of the Merc's biggest successes, Mr. Me-lamed pointed out, include the Standard & Poor's 500 futures contract to help investors who want to hedge against stock market swings, Swiss franc and German mark futures to hedge against currency change. The Merc, like other exchanges, is a non-profit enterprise, whose 2,725 members include

(Continued on Page 13, Col. 5)

AT&T Is to Cut **24,000 Jobs** At Major Unit

Compiled by Our Staff From Dispatches NEW YORK - American Telephone & Telegraph Co. said Wednesday that it is eliminating 24,000 jobs. or about 20 percent of the work force, at its Information Systems unit.

conditions could require additional job reductions.

Following the 24,000 reduction in jobs, Information Systems will have about 93,000 employees.

Although cuts were expected, the figure was higher than the 20,000 jobs hinted at last week by the company, and the announcement brought angry reaction from the Communications Workers of America, which represents AT&T employees. The union said the costcutting step was outrageous and would create major obstacles to next year's contract talks.

The company said the majority of cuts will take place this year, with the balance being completed in 1986. It said about 30 percent of the jobs lost will be in manage-Mr. Allen said the changes are

possible because all resources necessary to manage Information Sys-tems business have been brought together in a single organization under common management.
Last April, he pointed out, the

Federal Communications Commission approved a proposal that permitted Information Systems to streamline its operations.

He added that AT&T said it expects to begin achieving some of the benefits of the cost savings next year, and that the announcement Wednesday represents only one decision among many being made to realize improved profits.

Employees may be offered either a transfer to another job in ATT or financial incentives to leave, Mr. Allen said. Those incentives include newly enhanced pension plans for both management and nonmanagement employees. Attri-tion will take care of some of the

when people retire or resign.
After other efforts have been ex-

hausted, the remaining surplus po-sitions will be eliminated through layoffs, Mr. Allen said. stems unit.

Detailing the layoffs, he said the cuts would primarily affect staff

unit, said the cuts were necessary to and support positions totaling reduce costs and improve profit about 15,000 nationwide. Other margins. He warned that market cuts include 4,000 installation, maintenance and other technical support jobs, 3,000 jobs that handle product distribution, and 2,000 hourly factory jobs that have already been announced.

Information Systems, formerly American Bell, markets computer systems to business customers with 80 or more lines.

The unit, which employed about 118,000 people, has trimmed back about 4,800 jobs since the first of the year. AT&T, the parent company, has some 360,000 employees on the parent of the year.

(AP, Reuters, UPI)

Brazil's Bankers Agree to Deferral

NEW YORK — An interna-tional banking committee agreed Wednesday to recommend that Brazil's 700 creditor bankers extend a moratorium on the nation's debt repayment

for another 140 days.

Brazil requested the delay because it still has not reached agreement with the International Monetary Fund on an economic austerity program it will follow in return for new loans. The moratorium covers only principal of the debt of more than \$100 million. An earlier deferral expires at the end of the month.

William Rhodes, the Citibank official who chairs the committee, said that banks also will be asked to keep open \$16-billion line of credit for Brazil.

another broad, sustained advance evolve," he said. Christoph Gruebler, who manages more than \$200 million at his own in Zurich, sees the U.S. economy, saddled with heavy federal and consumer debt, struggling in the said of the broad in November. BASF Posts 37% Gain

West German chemicals companies, Hoechst AG and BASF AG, reported Wednesday increases in first-half profits and sales.

Hoechst said world group pretax earnings rose 11.5 percent to 1.65 billion Deutsche marks (\$611 million) in the first half of 1985, from 1.48 billion DM a year earlier. Sales in the period totaled 22.22

billion DM, up 7 percent from 20.71 billion in the earlier period. Parent pretax profit totaled 813 million DM, up 26 percent from 644 million DM a year earlier. Sales for the parent company rose 9 percent to 7.91 billion DM from 7.24 billion DM earlier.

The figures were disclosed in an interim report to shareholders. Hoechst said that it expects business will remain satisfactory during the second half of 1985. The company added that even if worldwide economic activity slackens and the dollar continues to decline, it should show a satisfactory performance for the year.

It said both sales and earnings FRANKFURT — Two major during the second quarter re-west German chemicals compa-mained at the high levels of the first three months. Domestic sales was stronger than a year ago, though this partly reflected strikes in the early summer of 1984.

Hoechst said foreign sales in the first half of 1985 developed most favorably in Western Europe and Australia. But the high dollar made imports into the United States cheaper. As a result, sales of its American Hoechst Corp. were adversely affected, the company said.

The major contribution to firsthalf profit gain came from West German operations, but earnings also developed positively abroad apart from the United States, South Africa and Argentina.

BASF reported that group pre-tax profit before third-party earn-ings rose 37 percent to 1.72 billion DM in the first half from 1.25 billion DM a year earlier.

Sales increased 11 percent to 22.45 billion DM from 20.20 billion DM in the earlier period.

2 Years After Rescue, H.K. Dollar Flies High

By Dinah Lee International Herald Tribune
HONG KONG — Next month, Hong Kong will celebrate the second anniversary of "Black Satur-day." That was Sept. 24, 1983, when uncertainty about the colo-

ny's future — once China takes over in 1997 — sent the Hong Kong dollar plummeting 10 percent, to a record low of 9.55 to the U.S. dollar. It was the largest single-day loss in the currency's history. The political anxiety that had been barely contained for many months burst into panicked buying of gold, U.S. dollars and all manner

of consumer goods, from stereo systems to proceries. Hong Kong's political future now seems settled by a agreement. reached last December and ratified in May, between Beijing and Lon-don, and the Hong Kong dollar is strong. Huge amounts of capital are flowing into, not out of, the

British colony. These inflows have produced an excess in liquidity in the Hong Kong-dollar market since the signing of the Sino-British agreement.
Call rates in the money market have dropped to just under 4 percent from a high of about 16 percent a year ago. Not surprisingly, the economic

recovery has led to widespread discussions during the last lew weeks

about whether the two-year-old government rescue package linking

dollar may require some readjust-ment. That question has itself aggravated the situation, with speculators buying Hong Kong dollars in anticipation of a new exchange

The rescue package that arrested the Hong Kong's dollar's plunge two years ago was the controversial brainchild of John Greenwood, a little-known British economist at the time and an admirer of Milton Friedman, the U.S. economist who won a Nobel prize for his monetarist work and is known as a devout free-market supporter. Mr. Greenwood had been working in the Hong Kong offices of GT Management Ltd., a British investment

His idea required the colony's two note issuing banks — the Hongkong & Shanghai Banking Corp. and Standard Chartered Bank — to pay the government 100 U.S. dollars for every 780 Hong Kong dollars they printed, and to (Continued on Page 11, Col. 6)

Report Sees Slowdown In Britain's Economy

Retters

LONDON — One of the longest periods of British economic growth in recent history may be coming to an end, according to an economic report published Wednesday.

The National Institute of Economic and Social Research, an independent economic forecasting group, said in its summer review that the next year would see a further slow rise in unemployment to 3.31 million from about 3.18 million, or 13.1 percent of the work force, last month.

"The long period of steady, if moderate, ex-"The long period of steady, if moderate, ex-pansion may soon be coming to an end," the institute said. It based its forecast on an expect-

ed decline in manufacturing exports as a result of the new strength of the pound against the dollar. The institute expected total output to continue growing slowly until the end of this year before tailing off. It also forecast that inflation would be cut in half from its current annual rate

of 7 percent, provided the pound remained steady against the dollar. This would produce a fall in interest rates and contribute to a sharp improvement in living standards for those with jobs, it said.

BARCELONA — The management of the Barcelona Stock Exchange has asked that foreign investment restrictions be lifted, giving it the same legal facilities as the Madrid exchange, a Barcelona bourse spokesman said Wednesday bourse spokesman said Wednesday.

The Trade Ministry has allowed management of the Madrid exchange to hold deposited stocks acquired by foreign investors, lifting an exchange controls requirement that they be deposited with banks.

The Barcelona spokesman said management there asked the ministry for the same permission and that stock exchanges in Bilbao and Valencia planned to file a similar request.

United Wins U.K. Clearance To Attempt Fleet Takeover

By Bob Hagerty International Herald Tribune

LONDON — The government Wednesday cleared a plan by United Newspapers PLC to attempt a takeover of Fleet Holdings PLC which publishes the Daily Express, the Daily Star and other newspapers and magazines.

Based on Fleet's current share price, the company is valued at £279 million (about \$389 million). United, which owns Punch and other magazines and newspapers, welcomed the decision but declined to announce terms. The company said its board would announce its intentions shortly. United already owns 20 percent of Fleet.

In considering terms, United said, it would be influenced by a drop in the market value of Fleet's shareholding in Reuters Holdings PLC, to about £78 million from £92 million last March 25, when United announced its intention to acquire

Canadian Group **Lowers Estimate** For Hibernia Oil

CALGARY, ALBERTA - The Canadian Petroleum Association said Wednesday it revised downward the size of the Hibernia oil field off Newfoundland to estimated oil reserves of 648 million barrels, from 1.10 billion.

The association attributed the decrease to a better understanding of Hibernia's geology after six £22.1 million a year earlier. He forecast that United would show

What was once thought to be a large, connected, oil-bearing formation has turned out to be a fractured structure of smaller oil de-

posits, the association said.

Fleet retorted Wednesday that its board believes the company's value is "greatly in excess of the current market price." Ian Irvine, Fleet's managing director, added: "We can see no reason why we should put two companies together such as Fleet and United."

In its report, the Monopolies and Mergers Commission said the proposed takeover would have no significant effect on newspaper com-

Derek Terrington, a newspaper analyst at Grieveson, Grant & Co. said he believed United was likely to seek a partner to help it buy and

operate Fleet.
He noted that the acquisition would about double the size of United and that the company has had no experience in running national newspapers since 1930.

Finding such a partner would not be difficult, Mr. Terrington suggested. "There's always some-body willing to have a bash at run-ning national newspapers," he said. In 1984, United derived about half of its operating profit from the United States, where it owns PR

But the colony's financial secretary, John Bremridge, in called Atlas Copco "a very cheap his urgency to arrest the plunging Hong Kong dollar, boldly adopted stock" that was "bound to run if the rescue package and in doing so, the Swedish market becomes popudeparted from the Hong Kong gov-ernment's traditionally laissez-faire Mr. Fleming said it was likely

that Atlas Copco would raise its dividend to 6 kronor per share for 1985 from 450 kronor in 1984. Some months after the package was implemented, Mr. Bremridge confessed that he still awoke each Mr. Wachtmeister said that the morning to learn with relief that "the link," as it came to be known, dividend was a matter for Atlas Copco's board and shareholders' meeting to decide, but he hinted

was holding firm. Two years later, it is clear that that a payout increase might be the link has not only worked, but worked extraordinarily well.

Sales for Atlas Copco Airpower, By mid-July of this year, the Hong Kong dollar soared to its

trading at 7.71 Hong Kong dollars, or 1.15 percent higher than the linked rate, as the U.S. dollar fell in an international bout of selling triggered by doubts about the U.S.

H.K. Dollar Is Thriving With Linkage

To encourage a capital outflow to the U.S. dollar, the Association of Banks of Hong Kong adjusted Hong Kong dollar interest rates downwards twice in one week in July to rest at the present level of an annual 6 percent for prime lenders. This was a dramatic contrast to the high of 17 percent reached in July 1984.

Commercially available bank deposit rates for three months fell below the Hong Kong annual rate of inflation of about 3.6 percent, making them negative interest rates in inflation-adjusted terms.

Market rumors that the link would be adjusted to accommodate the strong Hong Kong dollar gained momentum, and the British--based Henley Center for Forecasting reported that a continuing weaker U.S. dollar and capital inflows to Hong Kong would result in a "relaxation" of the link in the last quarter of this year.

However, in the weeks since the last readjustment of the local interest rates, the U.S. dollar has gradually firmed in Hong Kong, with the help of large Hong Kong banks, particularly Hongkong & Shang-hai. They are reportedly selling Hong Kong dollars in London, and

tracted general trading out of the local currency. With the firming of the U.S unit, the exchange link bo tween the two currencies now holds at around 7.79. The Hong Kong dollar closed at 7.8055 to the U.S.

dollar Wednesday in Hong Kong. Continuing low Hong Kong-dollar interest rates have speeded up a property-market recovery, which was already well underway. The low interest rates have also fueled the local stock market, which leaped 29 points Aug. 6, to pierce the 1,700 mark on the Hang Seng index, its highest level in four years. On Wednesday, however, the Hang Seng fell 41.96, to 1,650.78.

However, speculation about the possible future readjustment of the link in the future lingers, not entirely erased by repeated public gov-ernment endorsements of the link. In July, the colony's secretary for monetary affairs, Douglas Blye, said that the government might even approve of negative deposit interest rates, whereby bank cus-tomers would be charged for making deposits. Peter Wrangham, general manager of Hong Kong & Shanghai Bank, said the imposition of negative interest rates was possi-ble, "but practically speaking, terribly difficult to implement."

At the same time, Mr. Wrangham said it was premature to assume that a readjustment of the link was needed.

On the question of relinking the local dollar to a basket of currenbuying U.S. dollars in Hong Kong. local dollar to a basket of currenties. Mr. Wrangham warned: "It ferential between U.S. dollar and might throw more mud into the

Wn A To Reveal Secret Formula U.S. Judge Orders Coca-Cola

ATLANTA — Coca-Cola Co. has vowed to keep secret its 99-year-old formula for Coke, despite a federal judge's ruling ordering the soft-drink maker to disclose the

recipe.

The order came Tuesday in a 1983 lawsuit filed by 40 Coca-Cola bottlers over the company's pricing policies. The bottlers are seeking formulas for all of Coca-Cola's drinks in a bid to prove that the beverages do not differ substantially and should be sold under the

same pricing structure.
U.S. District Judge Murray ware, agreed that Coca-Cola should divulge the formulas, but only to attorneys and experts representing the bottlers.

Nothing is sacred in civil litigation," the judge said.
"The company has never dis-

Olivetti, Toshiba Form Venture

TOKYO - Olivetti SpA of Italy has set up a joint company in Japan with Toshiba Corp., a

spokesman for the new constant said Wednesday.

The company, Olivetti Corp. of Japan, is capitalized at 2.44 billion yen (\$10.33 million), with Olivetti holding an 80-percent stake and Toshiba having 20 percent, the spokesman said. It has taken the name, busi-

ness and service activities of Olivetti's wholly owned subsidiary, which is now renamed Olivetti Properties of Japan Inc. The changes took effect on Aug. l.

closed the secret formulas for its products and that policy will not change," said a Coca-Cola spokes-man, Randy Donaldson, The Atlanta-based company is studying its options in the case, he said.

The formula Merchandise 7X is perhaps one of the best-kept secrets in U.S. industry. It is kept locked in an Atlanta bank vault and is known to only a few company exec-

The quarrel between Coca-Cola and the bottlers was triggered by the 1982 introduction of Diet Coke, the company's first product to use the name "Coke" on a product other than its standard-bearing soft

The company said then that because Diet Coke was a different product than Coca-Cola, it was not bound by its existing contract with the bottlers and thus could raise the price bottlers pay for the diet drink, said Bill Schmidt, head of the Bottlers of Coca-Cola U.S.A., which has taken Coca-Cola to court.

Bottlers pay between \$2.73 and \$3.26 a gallon for old Coke and \$3.80 and \$4.60 for Diet Coke, depending on whether they have signed supply contracts with the company, Mr. Schmidt said.

The issue became murkier still when Coca-Cola replaced old Coke with the new version last April, and three months later, bowed to consumer pressure and revived the Real Thing, renaming it Coca-Cola

Coca-Cola said that the products involved are Coca-Cola, Coca-Cola Classic, Diet Coke, Caffeine-Free Coke, Caffeine-Free Diet Coke and Cherry Coke.

The formula for Coca-Cola was developed on May 6, 1886, by an Atlanta pharmacist, John Pemberton, who stirred up the first batch in a three-legged brass pot in his backyard. (AP, WP, Reuters)

COMPANY NOTES

Bell National Corp. has filed for reorganization under Chapter 11 of the U.S. federal bankruptcy code. Its subsidiary, Bell Savings & Loan Association, was taken over by federal regulators last month, leaving Bell National with a preliminary negative net worth of \$23 million.

British Petroleum Co. PLC has sold its 3.6-percent stake in Johnson Matthey PLC, industry sources said. BP bought the stake last October after the Bank of England stepped in to rescue Johnson Matthey's troubled banking sub-

Control Data Corp., the U.S. computer concern, has tentatively agreed to sell its Magnetic Peripherals Inc. plant to three private investors as part of a broad costcutting plan that began last spring.

Terms were not disclosed. Dao Heng Bank Ltd. has no fi-nancial problems despite rumors to the contrary, the Hong Kong banking commissioner, Robert Fell, said. He was commenting after a routine examination of the bank's finances. Dao Heng is incorporated in Hong Kong but owned by Hong Leong Co. (Malaysia) Bhd.

Enterprise Oil PLC of Britain said it has raised its stake in Saxon Oil PLC to 15.84 percent. Earlier this week, Enterprise secured maority support from the Saxon board for a 540-pence (\$7.40) cash bid for the company, but a proposal by Saxon Petroleum Corp. PLC, a newly formed concern, to merge Saxon Oil with Charterhouse Petroleum PLC remains outstanding. Falconbridge Ltd., the Canadian metals company, said 2,000 union-

ized workers at the company's Sudbury, Ontario, operations went on strike over a new contract. The company maintained that a tentative accord was agreed on four hours before the strike.
Firestone Tire & Rubber Co. has

sold a 51-percent stake in its East African subsidiary to a Kenyan investor group, Sameer Investments Ltd. The price was not disclosed.

Hongkong & Shanghai Banking
Corp. has set up a joint venture
with Sino Master International Group to build a 400-room medium-class hotel in the Tsim Sha Tsui district of Hong Kong. The bank will have a 32-percent stake in the project. Sino Master, a Chinabased joint venture, will have the remaining stake.

Metropolitan Life Insurance Co. said it had agreed to buy Century 21 Real Estate Corp., the largest U.S. real estate sales organization, from Transworld Corp. The sale price was not disclosed but analysts said it exceeded \$200 million.

PT Batubara, Indonesia's state coal company, said it awarded a 30-year production sharing contract to mine coal in West Sumatra to an Indonesian-Australian jointventure company, PT Allied Indo

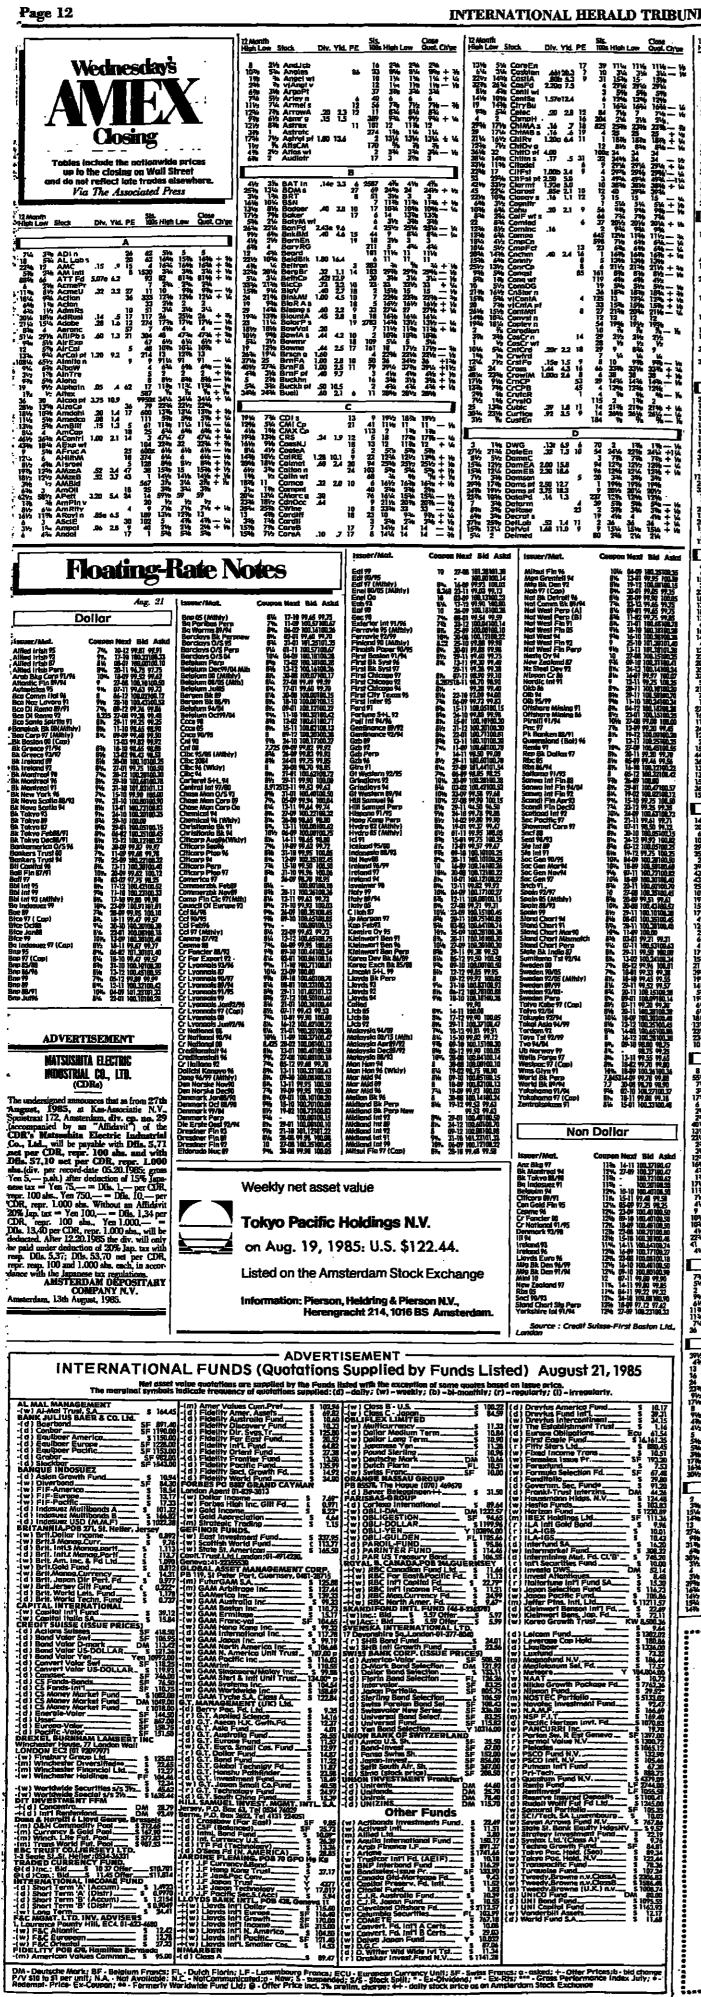

Sears Roebuck & Co. of the United States said that more than 3,000 merchants in Georgia have agreed to accept its new financialservices card, and applications for the card will begin to be processed the week of Sept. 9. Sears plans to officially launch its Discover card early next year. Georgia will be a test market.

THE EUROMARKETS

Borrowers Tap Virtually All Market Sectors

By Peter Conradi

LONDON — Borrowers tapped virtually all sectors of the Eurobond market Wednesday with a crop of new issues that included two more dollar-straight issues and a couple of dual-currency yen/dollar bonds, dealers said.

But trading on the secondary market continued quiet, with dol-lar-straight-bond prices up 1/2 to 1/2 point from Tuesday's close and floating-rate notes unchanged to

On the heels of Tuesday's \$400 million of dollar-straight Eurobonds, the Dutch insurance company, Aegon NV, launched a \$75million, seven-year issue paying 10% percent and priced at par.

The lead manager, Morgan Guaranty Ltd., said Aegon's bond was callable in the fifth year at 101, declining by 1/2 point a year thereafter. It was quoted on the market around its total 1%-percent fees at

\$200- million, 15-year floating-rate-note issue for National Bank

of Hungary to a mixed reception. Some dealers said the issue's coupon of ¼ point above the sixmonth London interbank offered rate was not generous enough, noting that an existing bank issue paying % point over Libor was curbing interest in the new offering. But a Nomura official reported "fairly good demand" for the notes.

One dealer said the issue was quoted at 98.125 on the market, just inside its 2-percent fees. In the other sectors of the primary market, issues from Anheuser

Busch Cos. and Oesterreichische Kontrollbank added to the recent spate of dual-currency bonds that pay interest in yen but are redeem-bable in dollars.

104-percent issue, due 1993 and lead manager, IBJ International priced at par, with Union Bank of Ltd. It is redeemable for \$55.3 million for an effective exchange rate likely lead manager.

Late in the day, Nomura International Ltd. officially launched a specific control of 208 years and of 208 years at an effective 209 year-dollar rate. No a big bull market," he said. "I'm market quote was immediately available. The yen closed at 237.50

to the dollar Wednesday in Tokyo. Oesterreichische Kontrollbank's priced at par, with Banque Paribas Capital Markets as lead. It is reeffective foreign-exchange rate of 192.3 yen to the dollar. No market price was immediately available.

Two Canadian borrowers also launched new Eurobond issues. Canadian Pacific Ltd. issued 75 million Canadian dollars of fiveyear bonds, paying 10% percent and priced at par, with Wood Gundy Inc. as lead. Xerox Canada Finance Inc. followed, with a fiveyear, 40-million European-curren-

OUR THREE SELVES: The Life of Radelyffe Hall

By Michael Baker. 386 pages. Illustrated. William Morrow, 105 Madison Avenue,

New York, N. Y. 10016. Reviewed by John Gross

Reviewed by John Gross

ARGUERITE Radclyffe-Hall — she dropped the Marguerite and the hyphen, and to ber friends she was always "John" — began publishing poetry, at her expense, in 1906, when she was in her 20s: unremarkable lyrics, which lent themselves to being set to music as drawing-room ballads. After World War I she turned to fiction. Her first novels enjoyed a moderate degree of upper-middle-brow success. Then in 1928 came "The Well of Loneliness," which promptly got banned in Britain and the United States for its open presentation of lesbianism. presentation of lesbianism.

This was enough to confer international fame. When the American ban was lifted on appeal, the book became a runaway best seller, and though British readers had to wait until 1949 to buy copies over the counter, they could get hold of an edition printed in Paris. "The Well of Loneliness" has been reprinted many times, in many languages, and most readers of fiction are probably still aware of it, if only by

hearsay.

Radciyffe Hall's mother's family came from Philadelphia. On the English side, her grandfather was a prominent physician; her father, who rejoiced in the name Radciyffe Radciyffe Radciyffe. Hall (and in the nickname "Rat"), decamped soon after she was born and devoted the rest of his fairly short life to gentlemanly idleness, leaving her to the mercies of a mother who bullied and neglected her. At 21, she inherited her grandfather's fortune — he had had no illusions about his son, and had willed it direct-

ly to her — and made her escape.

At first that meant travel, country life (she was passionately fond of riding and hunting), a series of inconclusive relationships with other women. Then, when she was 27, she fell in love with Mabel Batten, familiarly known as "Ladye," who was 23 years her senior - a famous beauty (though she had begun to put on weight) and a renowned amateur lieder singer. Ladye's elderly husband acquiesced in the women's friendship, and after his death they set up house together. The idyll clouded over when Hall also became involved with Una

Troubridge, a married woman in her 20s. Although Ladye tried to take a maternal, for bearing attitude, there was an inevitable buildup of tension, and one quarrelsome evening she had a stroke, from which she died a few days later,

The following year Una went to live with Radelyffe Hall, and not long afterward she and her husband, an admiral who had found himself in deeper waters than he was accustomed to, signed a legal deed of separation. Both women had been left with a huge sense of guilt about Ladye, which they were able to alleviate only by making a cult of her memory, arrangonly by making a cuit of ner meanty, arrang-ing for Masses to be said for her and burning votive candles (they were both devout Catho-lies), and communing with her through a medi-um. (they were also spiritualists, inconsistent though that might seem with their Catholi-

The seances remained a feature of their life together over the next 25 years. As Michael Baker says in his new biography of Radclyffe Hall, "Ladye, alive, had proved a source of friction and guilt between John and Una. Dead, she was transformed for both into a combination of idol, confidence and ultimate arbiter." While only a few close friends were let in on the secret of their enduring connection with her, it was hinted at in the dedication Hall used in several of her books, which has provided Baker with his title - "To Our Three

At first sight this may not seem a particularly appealing story, but in Baker's hands it makes riveting reading. You begin by wondering whether Hall can sustain a full-scale biography (by now "The Well of Loneithess" has little more than limited historical interest); you end up by being avid for yet more detail. The book is saturated in the atmosphere, idiom, fashions (including emotional fashions) of its period; it throws fascinating light on a literary world that no longer exists and on a lesbian world that was still half-hidden in the shadows.

In the end, however, the chief fascination lies in Radclyffe Hall's personality, and in the interplay (sometimes poignant, sometimes comic) between her general outlook — which in most respects was highly conventional and conservative — and the rebellious role into which she was cast by her determination to be bonest about her sexual preferences.

Hetes

She could be very seigneurial, remarking of one bibulous aristocratic guest, for instance, that "if you want to have a properly run house, you can't have people like him around. The servants won't stand for it." Some of her views do her little credit — she was a fervent admirer of Mussolini - and there were times when her courage in personal matters was indistinguishable from ruthlessness. But she suffered, particularly in later life, when she became horribly obsessed with a White Russian called Evguenia Souline who preyed on her for money painful and rather sinister episode that

dragged on for years.

She also did the undeniably brave thing in going ahead with "The Well of Loneliness."

The book may be dated, it may draw a misleading equation between lesbianism and pseudomasculinity, but to read Baker's account of its publication and the witch hunt stirred up against it is to acquire fresh respect for its author. Her full story was well worth telling, and Baker tells it with a nice sense for of its dramatic possibilities.

John Gross is on the staff of The New York

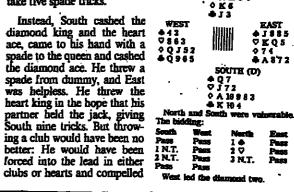

By Alan Truscott North-South gained heavily on the diagramed deal when South brought home an apparently hopeless

three-no-trump contract. The opening lead of the diamond deuce was favorable, allowing South to win in the closed hand with the eight, but it might seem that the bad lie of the opposing cards doomed

He began by taking a heart finesse and losing to the queen. East shifted to a club, which was ducked to the queen. East ducked the club return, allow-ing dummy's jack to win, and

South was now headed for de- to lead from the spade jack at feat if he made either of the the finish. obvious plays: taking a second

heart finesse or attempting to take five spade tricks. **\$13** Instead, South cashed the diamond king and the heart ace, came to his hand with a spade to the queen and cashed the diamond ace. He threw a SOUTE (D) spade from dummy, and East was helpless. He threw the heart king in the hope that his partner held the jack, giving South nine tricks. But throwing a club would have been no better: He would have been forced into the lead in either

APPEARING EACH WEDNESDAY

AND REDAY IN THE HIT

Rangers 3, Red Sox 1: In Boston,

Toby Harrah homered to lead off

the eighth and Texas added two

more runs (on an RBI double by

Gary Ward and a single by Bobby

Jones) to end a six-game losing streak. Knuckleballer Charlie

Hough earned his seventh victory

in nine starts since July 5. Hough

struck out seven, didn't walk a batter and allowed only one runner

Blue Jays 3, Indians 2: In Cleve-

and, Tony Fernandez's second

RBI single of the night scored Jesse

Barfield for the seventh-inning run that rallied Toronto past the Indi-

kee, Rick Manning singled home the winning run to cap a three-run

Brewer ninth. Minnesota starter

John Butcher took a four-hit shut-

out into the inning, but Robin

Yount led off with a single and that

brought on reliever Steve Howe

who immediately gave up a single to Cecil Cooper. Ben Oglivie then

grounded to shortstop Alvero

ond, allowing Yount to score. Kent Hrbek retrieved the ball and threw

home, but catcher Tim Laudner

droped the ball as Cooper scored

and Oglivie went to third. Ted Sim-

mons was intentionally walked be-

fore reliever Ron Davis got Bill

Schroeder to ground into a double

oinoza, who threw wildly to sec-

Brewers 3, Twins 2: In Milwau-

past second base.

Blanking Giants, Gooden Fans 16

Compiled by Our Staff From Dispatches NEW YORK - Dwight Gooden, with something to prove, facing the worst hitting team in the major leagues: It hardly seemed fair and in fact turned out to be pretty one-sided.

Gooden struck out a majorleague season-high 16 batters and registered a seven-hitter for his

BASEBALL ROUNDUP

13th consecutive triumph here Tuesday night as the New York Mets snuffed the San Francisco Gi-

The victory, coupled with Houston's pounding of St. Louis, widened the Mets' lead in the National League East to 11/2 games.

In his previous outing Gooden gave up five runs and eight hits in five innings against Philadelphia. "I said to myself 'I'm a better pitcher than that," " he said. "This builds my confidence back up. The bad performance is behind me now. I hope there are no more ahead."

Barring catastrophe, that propsect seems remote. On Tuesday the 20-year-old right-hander:

Lowered baseball's best earned-run average to 1.74;

Raised his season strikeout total to 208, tops in the majors; · Became the second player in history to strike out 200-plus in each of his first two seasons (the other was Herb Score, who did it with the Cleveland Indians in 1955

his sixth shutout of the season, ty- a run, tripled with two outs in the California, Mattingly, the league's ing him with John Tudor of St. Louis for the major-league lead.

Gooden struck out the side twice and walked three in raising his sea-son mark to 19-3, tying him with the Cardinals' Joaquin Andujar for the major-league lead in victories. Six of Gooden's last eight starts have resulted in complete-game tri-

"He gets that determined look on his face, "said the Met manager, Dave Johnson, "I feel sorry for San Francisco. He's got a history of coming back against the club that roughed him up or coming back strong in his next start after he gets roughed up."
The Mets scored twice in the

second inning, on run-scoring sin-gles by Rafael Santana and Lenny Dykstra. A double by Wally Backman and a two-out single by Gary Carter produced the game's final run in the fifth.

Amid all but universal praise for Gooden's performance (even home plate umpire Bob Engel allowed that "he was outstanding, obviousone. Said Davis, who had three starter Gooden didn't strike out: 'He ain't God, man."

Astros 17, Cardinals 2: In Houston, Mark Bailey hit his second grand-slam home run of the season and Dickie Thon drove in four runs with a triple and homer to highlight a 19-hit attack in which every Astro starter scored at least once.

11th to score Steve Sax with the reigning batting champion, has hit decisive run for Los Angeles.

Padres 1, Expos 0: In Montreal winner Dave Dravecky worked seven strong innings and fifth-inning doubles by Terry Kenedy and Kevin McReynolds made the Expos 1-0 losers for the second straight

Pirates 3, Reds 2: In Pittsburgh, Jason Thompson hit a tie-breaking home run in the fourth and Rick Reuschel won his first game in more than a month as the Pirates edged Cincinnati, Mario Soto lost for the first time in nine career decisions at Three Rivers Stadium. Pete Rose, the Reds' player-manag-er, went hitless and still needs 15 hits to break Ty Cobb's all-time

Cubs 5, Braves 2: In Atlanta. Ryne Sandberg's two-run homer highlighted a three-run eighth that rallied Chicago past the Braves. Mariners 4, Orioles 3: In the

American League, in Seattle, Gorman Thomas walked with the bases loaded in the ninth to push across ly"), Chili Davis was a minority of Jack Perconte and end Baltimore's six-game winning streak. Perconte singles and was the only Giant singled to center with one out off reliever Nate Snell; Phil Bradley singled him to third and Al Cowens walked on four pitches to load the bases before Snell walked Thomas - also on four pitches.

Yankees 8, Angels 5: In Anaheim, California, Don Mattingly's two bases-empty homers (which raised his RBI total to a major and 1956):

Dodgers 5, Phillies 4: In Philaleague-leading 100 for the year)
bighlighted a five-home run bargame, a National-League high, and who earlier had doubled and scored

Dodgers 5, Phillies 4: In Philahighlighted a five-home run barrage that powered New York past

play - Oglivie staying at third. But Manning singled off Davis's glove to score Oglivie. White Sox 2, Royals 1: In Chicago, second baseman Frank White booted Luis Salazar's grounder with two out and the bases loaded in the ninth, allowing pinch-runner Scott Fletcher to score the game-winner for the White Sox. Kansas City center fielder Willie Wilson. attempting to steal second base in the third inning, was knocked un-

going to make the 10 more yards.
"The only time I'm going to run talized for X-rays and observation. fornia. Detroit managed only five was feeling talkative. out of bounds is if a gain is impossible. My coach would probably be hits, but home runs by Larry Herndon and Tom Brookens were shocked if he saw me run out of enough to defeat the A's. (UPI, AP)

Willie Wilson collapsed (and Chicago second baseman Julio Cruz covered up) after a throw by catcher Carlton Fisk nailed the Kansas City baserunner in the neck as he tried to steal second Tuesday night. Knocked unconscious, Wilson was hos pitalized for observation.

Athletes Taking Out Insurance Against Career-Ending Injuries

By Gary Libman Los Angeles Times Service LOS ANGELES - When Dave Williams was catching 101 passes and was being chosen all-American at the University of Illinois last season, he didn't worry about a

career-ending injury. But his father worried enough for both of them.

"One time my father made the comment that he wouldn't let me go back to school unless I got insurance," said the wide receiver. "I don't know how serious he was, but

National Football League scouts had said that Williams could be a first-round choice in their player draft this winter, and Williams realized he would get hit hard five or six times a game during his senior can be in jeopardy. Quarterback year this fall. So the 6-foot-4, 197Bert Jones of the Los Angeles pound (1.93-meter, 89.3-kilogram) player began to consider a \$1 million Lloyd's of London policy to protect against a career-ending in-

Williams - whose brother Oliver and whose cousin, Phil Smith, are wide receivers for the Indianapolis Colts — mentioned his situation to his coach, Mike White, who said "he would find out the details" of the policy..."He knows the things I'll be doing."

White recommended the insurance to Williams, who played a year at Harbor Junior College in Los Angeles before transferring to Illinois, and to Illinois quarterback Jack Trudeau, another potential first-round draft pick.

Last April each player borrowed more than \$11,000 to buy a policy, which pays for a career-ending injury during the 15 months before each attends his first professional training camp next summer.

Williams and Trudeau bought the same protection as athletes including University of Iowa quarterback Chuck Long and former University of Miami quarterback proved inadequate Bernie Kosar, who signed this summer with Cleveland of the NFL.

Former University of Georgia running back Herschel Walker bought coverage in 1981 before joining the New Jersey Generals of the United States Football League.

The insurance is purchased by only the "top echelon of professional prospects who have proven value" as far as professional sports are concerned, said John Leavens, director of the legislative services committee of the National Collegiate Athletic Association.

The NCAA spurred the sale of the policies last January when it passed a rule that an athlete could buy them by borrowing money from a lending institution.

The NCAA hoped the rule would keep star athletes in school for another year, especially basketball players who can sign up for the National Basketball Association draft after each season of college eligibility. Draft requirements in football and baseball are more

The NCAA prohibited coaches stringent. and agents from buying the insurance - coaches so they would not use it to keep athletes in school and agents so they would not use it to gain control over an athlete before the time in his career when it became legal.

The buying of insurance by college players coincides with a similar move among professionals.

Although golfer Arnold Palmer insured himself against a careerending injury as early as the 1950s, many more athletes buy policies tiow as athletic salaries and the

stakes of athletic careers escalate. Player agents and insurance representatives say that many contracts in professional baseball and basketball are guaranteed, but that most football contracts are not -

so the policies can be particularly bounds or make 10 more yards, I'm helpful to NFL players.

In baseball and basketball the policies are typically used by young players who have not yet signed long-term, guaranteed contracts.
"It's a good vehicle to guarantee protecting an athlete during a transitional period," said Ron Shapiro,

the Baltimore agent for California Angel third baseman Doug De-Cinces and others. When the Baltimore Orioles visited Japan last winter. Shapiro took out a three-month policy on pitcher Mike Boddiker, 27, who won 20

games and lost only 11 in 1984, for \$500,000, the anticipated worth of Boddiker's contract the following Without such a policy, an athlete Rams retired in 1983 after an injury

that required the surgical removal of a ruptured cervical disk and the fusion of two broken vertebrae in the neck area. Jones was covered for a careerending injury and collected, according to John Jemison, owner of Sports Insurance International Ser-

vices in Houston. The policy paid \$1 million, a source said. A 1981 car accident paralyzed center Landon Turner and ended his career a few months after his University of Indiana team won the NCAA basketball championship. Turner received minimal help from his own auto insurance policy and

In 1978, a collision with Oakland defensive back Jack Tatum paralyzed New England Patriots wide receiver Darryl Stingley and ended his career.

his father's hospital-medical cover-

The league agreed to pay the remainder of Stingley's medical and living expenses after workmen's compensation and the NFL Players Association disability plan

Although the new policies guard against such occurrences, some

"You only get paid off if you're permanently disabled and can't play the sport again," said Peter ohnson, vice president of the International Marketing Group in Cleveland, who represents tennis player Martina Navratilova and football player Walker.

"Let's say you get injured in a post-season all-star game. You can play afterwards [but not as well] and your value goes down. You still can't cash in."

"What's probably needed is some type of program through the NCAA where all students get some type of disability [insurance]," said George Andrews, a Chicago attorney who represents Earvin Johnson of the NBA's Los Angeles Lakers.

Andrews notes that NCAA schools are required to keep injured student athletes on scholarship only for the year in which they are

"I'm not saying take care of him for life," he said, "but there should be some kind of therapy and job retraining."

Williams, whose brother Steven will go to Illinois this fall as a freshman wide receiver, worked with his friend Trudeau, the Illini quarterback, examining the poli-

They checked out different possibilities and decided on the same

day that they would go ahead. People said you got to take it easy here and there during the games" to avoid getting hurt, Williams said. "Well, I wouldn't do

"I like making touchdowns and I like running the ball, if there's a case where you could go out of year career).

SPORTS BRIEFS

Decker Sets 4:16.17 World Mile Mark

ZURICH (Combined Dispatches) - Mary Decker-Slaney of the United States lowered the world record for the women's mile by more than half a second here Wednesday night, clocking 4 minutes, 16.71 seconds at an international track meet at Letzigrund Stadium. Decker broke the mark of 4:17.44 set by Romanian Maricica Puica, the

Olympic 3,000-meter champion, in September 1982.

people think they contain a weak-

Hungarian Modern Pentathlon Titlist

MELBOURNE (AP) - Atrila Mizser of Hungary won the individual modern pentathlon world championship here Wednesday. The 24-year-old student clinched the title by finishing 50 meters (54.5 yards) ahead of defending champion Anatoly Starostin of the Soviet Union to win the 4,000-meter cross-country run, the four-day competition's final event. Mizser totaled 5,525 points for the five events (equestrian, fencing

swimming, shooting and running), followed by Starostin with 5,505 and Russian Igor Shvartz with 5,362. The Soviet Union won the team title; Hungary was second and Italy third.

UEFA Tightens Soccer-Match Security

PARIS (AP) - The Union of European Football Associations on Wednesday adopted measures to be taken by European soccer teams to prevent speciator violence at some international matches.

UEFA approved a document prepared by a study group following the May 29 riot in Brussels, when 39 people were killed and 450 were injured during the European championship game. Europe's national soccer federations, as well as public authorities, must subscribe to the document

Major League Standings or risk disqualification of their teams from European comeptition. UEFA categorized five "high risk" matches calling for heightened security measures. They are:

• UEFA Cup finals and semifinals, and the finals of the Cup Winners' Cup and Champions' Cup tournaments. • A match determined by UEFA to be potentially volatile because of the previous behavior of the fans of either team.

 A match in which visiting-team fans exceed 10 percent of stadium crevelent canacity, or when there are more than 3,000 visiting lans. • Matches drawing capacity crowds or more than 50,000 spectators. Matches attracting large numbers of "immigrant" fans — those with ookland national ties to the country of the visiting team but living in the host

Heightened security measures are to include strict control of ticket sales (match-day sales will be limited to two tickets per person); a ban on sales or consumption of alcohol in the stadiums; increased surveillance in the stands and at stadium entrances, and the searching of spectators.

country or a neighboring one.

Mets Sign Bowa for Rest of '85 Season

NEW YORK (AP) - Shortstop Larry Bowa, 39, who was cut last week by the Chicago Cubs, on Tuesday signed a contract with the New York Mets for the remainder of the season.

Bowa, whose .980 career fielding percentage is the highest for a shortstop in major-league history, earlier this season set the National League shortstop record for games played (he has played 2,212 in his 16-

"You folks up from the city?"

"Here for the racing?" Սե-հսե.

Seems a lot of folks are up here for the month, renting these houses. I delivered a package last week to some folks just up the road. The woman, she was wearing the biggest diamond ring I've ever seen and some kind of a green stone around her neck, must have been an emerald or something. Funny thing, those peo-ple went to the races just the other day and somebody came and stole all their jewels. Funny how someone always knows which people got

It seemed like the time to explain, quickly and firmly, that there were no jewels worth stealing at this residence. "Oh, I'm sure you're right-What's that? Oh, listen, no tip is necessary, terous of you, every little bit is but that's very appreciated. Thank you, thank you so much.
You folks be careful now, hear?"

One afternoon early in this year's annual race meeting, a steeplechaser in the sixth race at Saratoga Racetrack lost his jockey after the first jump, and continued on riderless. With no one to guide him, he nonetheless jumped the next hedge like a champion. Approaching the third fence, though, he shied, pulled himself up and ran around the side of it.

There was no difference in the height or shape

to jump the hedge that the riderless horse had avoided tripped and fell.

A tout working the grandstand was pontificating to a potential sucker on the virtues of the No. 5 horse.

"I'm telling you, bet your house, the horse is a cinch. If he comes in, all I ask is the proceeds of a \$20 win bet." The toutee, as toutees do, thought this sound-

after No. 5 finished a distant second to No. I, and was further discouraged when he saw the tout standing on line to collect "I thought you liked the 5," he said to the

ed like a swell arrangement. He was not so sure

"I liked him second-best," said the tout. "I bet the 1 and got some free insurance this way."
The toutee looked puzzled as to whether this was all proper, but after all, the tout had bet on

"O.K.," he said, "who do you like in the next

A minister whose parish is within driving distance of the track likes to spend Wednesdays on the Turf Terrace here. It is a day off, but he is ey's agent. sometimes called on for counseling anyway. A somewhat distraught bettor, having failed to pick a winner all day and looking like he was in trouble, shuffled over to the minister and asked

for some advice.
"I'm going bad," he said. "What should I do? Should I just go home instead of losing any more money?

'Do you have enough money to get along and feed your family?" the minister asked.

The better needed and explained that it was only his betting kitty he had almost depleted. not his enting money.

"In that case," the minister said, "my advice to you is to key the 4 over the 3, 6 and 7 in the triple and try to get it all back."

One New York City horseplayer who is spending his first August here is also spending his first month ever in a country house instead of a city apartment.

"I think there's some kind of animal out in the yard at night," he said after his first two nights here. "It's got me spooked. It keeps going beep-

a-beep, all night long,"
He was told it was probably a cicada.
"A chickadee? No, it don't sound like a chick-

adee." No a cicada, C-i-c-a-d-a. "Oh, you mean like the horse, Cicada. Why didn't you say so?"

On the first Saturday night of the 1985 meeting, many race-track regulars make a tradition of congregating at The Wishing Well, a local steakhouse where lies are swapped along with congratulations about having made it through

"This my 30th Saratoga," bragged one jock-

"My 38th," said a trainer.

"Pikers," said Paul Healy, an owner. "This is my 80th year here. The first time I came up I was 3 years old, and I'm 83 now." That ended the bragging contest, but a nit-

picker told him later that if he was 3 his first year and hadn't missed a season, this would actually be his 81st Saratoga.

"Well," he said, "80 sounds better. Eightyone would make me sound like a fossil."

BANGKOK POSTCARD

Japanese Who Stayed

By Surin Maisrikrod

B ANGKOK — Japanese soldiers, young, energetic and fired by nationalism, were sent to attack Thailand in World War II. For some of them, what was once a vassal land has become a happy home, probably forever.

About 50 Japanese veterans never returned home after their country surrendered 40 years ago. At first, some hid their identities. By now, however, according to Japanese officials in Bangkok, virtually all of the veterans have been quietly absorbed into Thai society.

"This is definitely my home. If Japan ever invades Thailand again, I will fight for the Thais," said Motoji Otani, 64, who owns a refrigerator repair shop called Thaio-

"I don't consider myself a Japa-nese now. I even forgot half the language," said Zunao Sasabe, a gardener, who fought as a Japanese Imperial Army infantryman in China, Cambodia and Vietnam.

On Dec. 8, 1941, after a brief resistance, Thailand relented to Japanese demands for use of its territory to as a launching pad for invasions of Burma and the Malay peninsula. The Bangkok government was later pressured into declaring war on the Allies, though Thais joined an anti-Japanese resistance movement and Thailand was not treated by the Allies as an enemy nation after the war ended.

When Japan surrendered, some Japanese soldiers stationed in Asian countries that had been conquered by the imperial army chose not to return to Japan.

About 20 settled in Burma. Last month one of these, Sakunojo Kitamura, made his first visit back to Japan. For the occasion, he dressed in a traditional Burmese sarong.

Those who stayed behind in Thailand did not have to face the kind of hatred against the Japanese that was so strong in countries such as China and the Philippines. where Japanese soldiers had committed atrocities. In recent years, only economic problems have marred Thai-Japanese relations.

"After losing the war, I heard rumors that there was nothing left in Japan - no food, no farm fields, nothing. So I thought it was no use

suda, 68, one of several Japanese

Matsuda said he escaped after his surrender and lived in disguise at a Buddhist monastery south of Bangkok, where he fell in love with a Thai woman whom he later married. Thai friends helped hide him from the Thai authorities, he said.

Matsuda has become a wealthy man, and plays an active role in the management of his four businesses: a travel agency, a coffee plantation, a night club and a company servicing sugar plants. He is a prominent member of the local Japanese business community - the largest foreign group in the country.

By contrast, Sasabe, the gardener, said: "I still live hand-to-mouth. I earn about 100 baht [about \$3.70] a day from my carpentry," in addi-tion to his job at an orchid nursery on the outskirts of Bangkok. He recently moved to Bangkok from the provinces, where over the years he had done rice farming and small-time contract work. Two of his daughters are abroad, in Italy and the United States.

He praised the hospitality he has received from Thai friends and acquaintances, who helped him flee the army and then obtained immigration documents for him under a alse Chinese identity.

Otani, echoing statements by other veterans, said: "I did not really know what was going on at that time. I was so young and everyone was a soldier. It was fun nehow to join the army. When I think back to those days it was all wrong. The Japanese army was so arrogant. But the war proved Japan

was just a frog in a small pond." Otani also made his escape when the war ended, went into business and started a family. He has five children and six grandchildren from two marriages. He said he now rarely eats Japanese food, and he takes part in traditional Thai

Otani said he had visited Japan twice since the end of the war. "I felt so different and empty," he recalled. "I could not even travel alone in Japan. I was really a foreigner. The moment I arrived back at Don Muang" - Bangkok's air-

to myself: 'Ah, I am home.' Art Buchwald is on vacation.

Antillean Prime Minister With Spirit

By Joseph B. Treaster
New York Times Service

WILLEMSTAD, Curação — In the annual carnival parade this year — the biggest, most rambunctious celebration on this island off Venezuela - a tall, imposing woman in a pink and green lame costume got a little more attention than the other

To the delight of some and the dismay of others, the focus of the cheers and flying confetti was Maria Liberia-Peters, who last September became the first woman to serve as prime minister of the Netherlands Antilles, six Caribbean islands colonized by the Dutch and now largely self-gov-

The 43-year-old former kindergarten teacher says she struggled with whether to participate in the carnival, as she had for the previous seven years, instead of taking the prime minister's traditional place in the reviewing stand.

She knew she wouldn't be happy as a spectator, she said. "Some people just feel it's not appropriate for a prime minister. I said. no, in the first place I'm Maria and in the second place I'm prime minister. So I'm going."

That kind of spirit and determination have made her one of the Netherlands Antilles' most popular leaders. Liberia-Peters, eader of the National People's Party, admires former U. S. Representative Shirley Chisholm and the late Indira Gandhi of India, and she is being favorably com-pared to Prime Minister Margaret Thatcher of Britain.

She has come to power in one of the most turbulent periods in Antillean history. After decades of prosperity, the economies of the two biggest islands, Curação and Aruba, are in trouble. Further, Aruba, which with Curação had shared the burden of supporting the four other islands, plans to separate from the federation early next year.

The Exxon oil refinery that provided about 50 percent of Aruba's income closed last spring and the Shell refinery in Curação, a major employer, says and "Si, si!" it may have to close unless the government can buy two-thirds

open. She said she was also workng on ways to balance the economy as revenues fall.

What I really hope," she said, "is that I will be successful in at least setting out the lines for the future, for a new future, so that the people of the Netherlands Antilles can say, 'O.K., we're going through a difficult situation, but nevertheless this is where it's going to lead to,' and that there is light. It's a situation you have to handle very carefully, so that my people don't panic. As the Spanish people say, I have to keep away la desesperación, the desper-

Liberia-Peters laughs easily and has the politician's knack of turning aside or seeming not to hear difficult questions. Like many Antilleans, she speaks four languages: Dutch, English, Spanish and Papiamento, a local combination of the first three with some Portuguese added. She peppers her English with Spanish exclamations such as "Correcto!"

More than previous prime ministers, residents say, she is using of the failing business.

Liberia-Peters's government is trying to find a way to keep Shell

newspapers, radio and television to reach the 240,000 people of the Netherlands Antilles. She has

REAL ESTATE

also met more often with business and community leaders.

"People appreciate that she keeps the various groups informed and that she is as balanced as possible and doesn't take sides," said Lionel Capriles, the head of Maduro & Curiel's Bank, the largest in the Antilles.

Liberia-Peters has also traveled more than is customary for prime ministers of the Netherlands Antilles, whose defense and many foreign affairs matters are still handled by the Netherlands. "I feel it's important that we let

we are, where we are, what we are and what we want," she said. In the fall of 1976, Liberia-Peters won a seat in the island government in Curação, which is similar to the Antilles government and has a larger budget. Since then she has been in charge of economic affairs, public health, labor and several other matters in the Curação government. When the National Peo-

ple's Party took a leading role in forming a new Antilles government it turned to Liberia-Peters, its top vote-getter, to be prime

mer kindergarten teacher is doing as prime minister, Liberia-Peters coolly suggests that "it would be incorrect to think that nothing has happened" since 1962, when she first entered a classroom as a teacher. She has a group of advis ers that she calls her "think tank," but supporters say she has a mind of her own. "She asks and she listens," Capriles said, "but she

takes the decision." Among her strengths, admirers say, is an ability to gain a consen-sus from the governing council of ministers and other groups with which she works. "She speaks with authority and she can con-vince people," a banker said.

Economists say that one of the Netherlands Annilles' problems is high wages that prevent the is-lands' goods and services from being competitive internationally. But the prime minister has resisted pressure to impose an across-the-board pay cut of 15 to 20 percent. Instead, she said, she plans to

put the economists' reports before the workers and their unions and give them "a reasonable time to get the feeling that, 'O.K., we have been granted the possibility to also make a move." Then, if they "don't come across," she said, "I think you have the way open for imposing" a pay cut. Liberia-Peters is married to a

civil servant, Niels Peters, 46. She met him on a high school basketball court; she was playing center on a girls' team and Peters, who had gained a reputation throughout the Antilles as a center, was assisting the coach.

It was not a blazing romance. She went off to the Netherlands the region, especially, know who for four years of college. Back in Curação, she joined a women's basketball team affiliated with a Roman Catholic school. Peters was on the men's team. About four years later they went on their first date.

Six years later - 14 years after they met — they were married. They have a 6-year-old daughter and a 4-year-old son, both born in the United States and adopted through the Roman Catholic archdiocese of New York.

She is asked what impressed her about Peters the first time they met. "His hook shot," she replied instantly.

PEOPLE

'Rambo': Real Blood

combat fatigues, cartridge belt and fake automatic rifle, lost his way of the ocean liner American Redelivering a "Rambo-gram" to a public. Martin Boyerle, president lawyer in Buffalo, New York, he of the U.S. company Marine Anadropped by the county courthouse for directions. In the ensuing panic, scores of police officers and sheriff's deputies scrambled through the courthouse with revolvers drawn, and one shot himself in the foot, before "Rambo" his mission completed, was jumped by an army of law enforcers. "I'm thinking about just hanging the whole 'Rambo gram' thing up," said John Gowen, whose Show Productions company, specializing in jocular telegrams, sent the messenger. Mark Stancapiano, 28, who does the Rambo-grams at \$64.95 each. recalled: "I see all these cops and what looked like 60 cop cars in front of the courthouse, and about 300 people outside watching. It was like 'Dog Day Afternoon.' I got a feeling that it could be me they're looking for. And I'm parked right in front of the damn place. So I thought, well maybe I can get to my car, maybe I can't I was gonna stash the gun in the bushes. But I decided simply to kind of walk to the car, with my gun all covered up in my shirt. But all of a sudden these cops cross the street, and then one of them says, 'Freeze!' " After persuading the authorities not to do anything rash, Stancapiano was taken to jail, charged with disorderly conduct and released. "He was just seconds away from being a statistic," said Lieutenant Francis Lee. Patrolman Gerald Baetzhold. 45, said of his wounded foot: "It"

When a well-muscled imperson-

day, the salvage operator's crew delivered from the wreck of a Spanish galleon the largest single haul of gold ever recovered from an ancient ship, an official of his Treasure Salvors Inc. said in Key West, Florida. Happy birthday, Mel — that's what we told him," a crewman, Derwin Washington, said Tuesday, the day before Fisher's 64th birthday. Divers excavating the wreck of Nuestra Señora de Atocha found about 150 pounds (68 kilograms) of gold, including 76 gold bars and gold chains and discs, said Bleth McHaley, vice

president of Treasure Salvors.

On the eve of Mei Fisher's birth-

still hurts like hell."

Canadian and U.S. treasure ator of Sylvester Stallone, sporting hunters have announced a project to retrieve treasure from the wreck of the U.S. company Marine Analysts, said he located the ship four years ago; it was reportedly carry-ing French-owned U.S. gold coms from New York when it sank in a collision with the Italian ship Flori-da off the northeastern U.S. on Jan. 23, 1909. Marine Analysts and its Canadian partner, Wolf Sub-Ocean, believe there is \$500 million worth of gold coins (\$3 million in face value) in the hold of the ship, about 250 feet (75 meters) down, 50 nautical miles from Nantucket, Massachusetts.

Makaziwe Plannia Mandela, 31, daughter of the jailed black South African leader Nelson Mandela, held a news conference at the University of Massachusetts in Amherst and said she had come to the United States to study and write about women's issues, not to discuss her country's problems. Mandela, a social worker, who is studying for a master's degree, said she sometimes felts like saying. "To" hell with being Mandela's daugh-

The Australian rock group Men at Work will tour China in November following intervention with Beijing by Prime Minister Bob Hawke, a government spokesman said Wednesday in Sydney. The group hopes to play Beijing, Shanghai and Nanking, a spokesman said Hawke had promoted the tour as an Australian contribution to the United Nations International Youth Year. Official sources said the tour was thrown into doubt after a controversial Beijing concert by the British group Wham!

The son of China's top leader, Desg Xisoping is in France to study care for the handicapped. Deng Pulang, 41, deputy director of the China Welfare Fund for the Handicapped, will visit rehabilitation centers for the disabled in Par is and other cites and meet with senior officials. He has been confined to a wheelchair since breaking his spine when when he was forced from a fourth-story window by Red Guards in 1967.
